SPECIAL PERMIT CONDITIONS ON NEXT PAGE

COMAL COUNTY

ENGINEER'S OFFICE

License to Operate On-Site Sewage Treatment and Disposal Facility

Issued This Date: **02/14/2023** Permit Number: **113612**

Location Description: 3660 TANGLEWOOD TRL
SPRING BRANCH, TX 78070

Subdivision:	Charles Murhart Survey Abs No. 404
Unit:	0
Lot:	0
Block:	0
Acreage:	14.2300

Type of System: Aerobic
Surface Irrigation / Drip Irrigation

Issued to: Rebecca Creek Campground

This license is authorization for the owner to operate and maintain a private facility at the location described in accordance to the rules and regulations for on-site sewerage facilities of Comal County, Texas, and the Texas Commission on Environmental Quality.

The license grants permission to operate the facility. It does not guarantee successful operation. It is the responsibility of the owner to maintain and operate the facility in a satisfactory manner.

Alterations to this permit including, but not limited to:

- Increase in the square feet of living area
- Increase in the number of bedrooms
- A change of use (i.e. residential to commercial)
- Relocation of system components (including the relocation of spray heads)
- Installation of landscaping
- Adding new structures to the system

may require a new permit. **It is the responsibility of the owner to apply for a new permit, if applicable.**

Inspection and licensing of a facility indicates only that the facility meets certain minimum requirements. It does not impede any governmental entity in taking the proper steps to prevent or control pollution, to abate nuisance, or to protect the public health.

This license to operate is valid for an indefinite period. The holder may transfer it to a succeeding owner, provided the facility has not been remodeled and is functioning properly.

Licensing Authority
Comal County Environmental Health

James F Connolly

ENVIRONMENTAL HEALTH INSPECTOR
OS0032485

Assistant
OS0034792

ENVIRONMENTAL HEALTH COORDINATOR

As a condition of this permit submittal, a meter must be installed on the outflow line of the pump tank. The readings from this meter must be recorded on a daily basis and submitted to the Comal County Environmental Health Department once a month for 12 months from the date the License to Operate is issued. If at any time the daily meter reading exceeds the permitted flow rate this permit will be void and a new permit must be obtained.

Re: Rebecca Creek Campgrounds
14.23 acres, 3660 Tanglewood Trail
On-Site Sewage Facility (OSSF) Permits 113609 & 113610

Mr. Sutcliffe :

Our office conducted a site visit yesterday at the referenced property. For your situational awareness I have attached pictures representative of our visit. Backfill materials have been washed away from the drip system leaving the system exposed and no longer compliant with OSSF Regulations.

Also, it has come to our attention that the daily water meter readings as required by the Special Permit Conditions for Permits 113611 & 113612 (see attached) have not been submitted. Please submit the required daily meter readings from mid-February 2023 to present.

Thank you,

COMAL COUNTY TEXAS

COMAL COUNTY

ENGINEER'S OFFICE

Permit of Authorization to Construct an On-Site Sewage Facility
Permit Valid For One Year From Date Issued

Permit Number:	113612
Issued This Date:	05/06/2022
This permit is hereby given to:	Rebecca Creek Campground

To start construction of a private, on-site sewage facility located at:

3660 TANGLEWOOD TRL
SPRING BRANCH, TX 78070

Subdivision:	Charles Murhart Survey Abs No. 404
Unit:	0
Lot:	0
Block:	0
Acreage:	14.2300

APPROVED MINIMUM SIZES AS PER ATTACHED DESIGN

Type of System:	Aerobic Surface Irrigation / Drip Irrigation

This permit gives permission for the construction of the above referenced on-site facility to commence. Installation must be completed by an installer holding a valid registration card from the Texas Commission on Environmental Quality (TCEQ). Installation and inspection must comply with current TCEQ and Comal County requirements.

Call (830) 608-2090 to schedule inspections.

******As a condition of this permit submittal a meter must be installed on the outflow line of the pump tank. The readings from this meter must be recorded on a daily basis and submitted to the Comal County Environmental Health Department once a month for 12 months from the date the License to Operate is issued. If at any time the daily meter reading exceeds the permitted flow rate this permit will be void and a new permit must be obtained.******

Permit Number

Instructions:

Place a check mark next to all items that apply. For items that do not apply, place "N/A". This OSSF Development Application Checklist **must** accompany the completed application.

OSSF Permit

- ✓ Completed Application for Permit for Authorization to Construct an On-Site Sewage Facility and License to Operate
- ✓ Site/Soil Evaluation Completed by a Certified Site Evaluator or a Professional Engineer
- ✓ Planning Materials of the OSSF as Required by the TCEQ Rules for OSSF Chapter 285. Planning Materials shall consist of a scaled design and all system specifications.
- ✓ Required Permit Fee
- ✓ Copy of Recorded Deed
- ✓ Surface Application/Aerobic Treatment System
  - ✓ Recorded Certification of OSSF Requiring Maintenance/Affidavit to the Public
  - ✓ Signed Maintenance Contract with Effective Date as Issuance of License to Operate

I affirm that I have provided all information required for my OSSF Development Application and that this application constitutes a completed OSSF Development Application.

AFFIDAVIT TO THE PUBLIC

THE COUNTY OF COMAL
STATE OF TEXAS

CERTIFICATION OF OSSF REQUIRING MAINTENANCE

According to Texas Commission on Environmental Quality Rules for On-Site Sewage Facilities (OSSF's), this document is filed in the Deed Records of Comal County, Texas.

I

The Texas Health and Safety Code, Chapter 366 authorizes the Texas Commission on Environmental Quality (commission) to regulate on-site sewage facilities (OSSFs). Additionally, the Texas Water Code (TWC), § 5.012 and § 5.013, gives the commission primary responsibility for implementing the laws of the State of Texas relating to water and adopting rules necessary to carry out its powers and duties under the TWC. The commission, under the authority of the TWC and the Texas Health and Safety code, requires owner's to provide notice to the public that certain types of OSSFs are located on specific pieces of property. To achieve this notice, the commission requires a recorded affidavit. Additionally, the owner must provide proof of the recording to the OSSF permitting authority. This recorded affidavit is not a representation or warranty by the commission of the suitability of this OSSF, nor does it constitute any guarantee by the commission that the appropriate OSSF was installed.

II

An OSSF requiring a maintenance contract, according to 30 Texas Administrative Code §285.91(12) will be installed on the property described as (insert legal description): 14.23 ac. Charles Morhart Survey Abs No. 404

The property is owned by (insert owner's full name): Alan Carranza, Member, Rebecca Creek Campgrounds, LLC

This OSSF must be covered by a continuous maintenance contract for the first two years. After the initial two-year service policy, the owner of an aerobic treatment system for a single family residence shall either obtain a maintenance contract within 30 days or maintain the system personally.

Upon sale or transfer of the above-described property, the permit for the OSSF shall be transferred to the buyer or new owner. A copy of the planning materials for the OSSF can be obtained from the Comal County Engineer's Office.

Septic System Service Agreement

I. **General**: This work for Hire Agreement (hereinafter referred to as "agreement") is entered into and between ***Rebecca Creek Campgrounds*** (hereinafter referred to as "Customer") and JT Environmental Service. By this agreement , JT Environmental Service and it's employees (hereinafter inclusively referred to as "Contractor") agree to render services at the site address stated below, and described herein, and the Customer agrees to fulfill his/her/their responsibilities, as described herein. The designed flow rate for this system is a maximum of ***500*** gallons per day.

II. **Effective dates**: This Agreement commences on ***November 2021*** and ends on ***November 2023*** . If this is an initial agreement (New Installation), the Customer will notify the Contractor within two(2) business days of the systems first use to establish the date of commencement. If no notification is received by the Contractor within ninety (90) days after completion of the installation or where county authority mandates, the date of commencement will be the date the "License to Operate" (Notice of Approval) was issued by the permitting authority. This agreement may or may not commence at the same time as any warranty period of installed equipment, but in no case shall it extend the specified warranty.

III. **Renewal:** This agreement shall automatically renew each at the same terms, conditions ,and costs unless either party gives notice of termination a minimum of thirty (30) days prior to the end of the first agreement period. See section IV.

IV. **Termination of agreement:** This agreement may be terminated by either party with thirty (30) days written notice for any reason, including for example, substantial failure to perform in accordance with it's terms, without fault or liability of the terminating party. If this agreement is so terminated, Contractor will be paid at the rate of $75.00 per hour for any work performed and for which compensation has not been received. After the deduction of any remaining monies from Prepayment for services will be refunded to Customer within thirty(30) days. Either party terminating this agreement for any reason, including non-renewal, shall notify in writing the equipment manufacturer and the appropriate regulatory authority a minimum of thirty (30) days prior to the date of such termination. Non payment of any kind shall be considered breach of contract and a termination.

V. **Services:** Contractor Will:
a. Inspect and perform routine upkeep on the On-Site Sewage Facility (hereinafter referred to as OSSF) as recommended by the treatment systems manufacturer, and required by state and/or local regulation ,for a total of three(3) visits per year. (**Residential**)
b. Provide written record of each visit to the site by means of an inspection tag attached or contained in the control panel.
c. Repair of Replace, if Contractor has necessary materials on site, any component of the OSSF to be failing or inoperative during the course of a routine monitoring visit. If such services are not covered by warranty, and services cost are $100.00 or less. Customer hereby authorizes Contractor to perform the service and invoice Customer for said service. When service cost are greater than $100.00, or if the contractor does not have the necessary supplies on site, the customer will be notified of required services and associated costs. Customer must notify Contractor of arrangements to affect repair of

system within two(2) days of said notification.
d. Provide sample collection and laboratory testing of TSS and BOD on a yearly basis (commercial systems only, as aplicable)
e. Forward copies of this agreement and all reports to the regulatory agency and the Customer.
f. Visit the site in response to Customers request for unscheduled services within forty-eight (48) hours of the date of notification (weekends and holidays excluded) of said request. Unless otherwise covered by warranty, costs for such unscheduled responses will be billed to the customer.

VI. **Disinfection**: The Disinfection system will be maintained by the Customer. A cost estimate can be provided if the customer can not perform this function. Customer initial AC.

VII. **Electronic Monitoring is not included in this agreement.**

VIII. **Performance of agreement:** Commencement of performance under this agreement is contingent on the following conditions:

a. If this is a 1. Contractor receipt of fully executed original copy or facsimile of this agreement and all documentation requested by Contractor.
2. Contractors receipt of payment of the Wastewater-monitoring fee in accordance with the terms as described in section XIV of this agreement.
b. If the above conditions are not met, Contractor is not obligated to perform any portion of this agreement.

IX. **Customers Responsibilities:** The Customer is responsible for each and all of the following:

a. Provide all necessary yard and lawn maintenance and removal of obstacles, including but not limited to : Dogs and other animals, vehicles, trees, brush, trash, or debris as needed to allow the OSSF to function properly, and to allow Contractor safe and easy access to all parts of the OSSF.
b. Protect equipment from physical damage including but not limited to damaged caused by insects.
c. Maintain a current license to operate and abide by the conditions and limitations of that license and all requirements for an OSSF from the State and/or local regulatory agency, whichever are more stringent, as well as proprietary systems manufacturer recommendations.
d. Notify Contractor immediately of any and all alarms, and/or any and all problems with. including failure of the OSSF.
e. Provide upon request by Contractor, water usage records for evaluation by Contractor as to the performance of the OSSF.
f. Allow samples at both the inlet and outlet of the OSSF to be obtained by Contractor for the purpose of evaluation of the OSSF. If these samples are taken to a laboratory for testing, with the exception of the service provided under section V, subsection d, above. Customer agrees to pay contractor for sample collection and transportation, portal to portal, at a rate of $35.00 per hour, plus associated fees for laboratory testing.
g. Prevent the backwash or flushing of water treatment of conditioning equipment from entering the OSSF.
h. Prevent condensation from air conditioning, or refrigeration units, or ice maker drains, from hydraulically overloading the aerobic treatment units. Drain lines may discharge into the surface application pump tank if approved by the system designer.
i. Provide pumping and cleaning of tanks and treatment units, when as recommended by Contractor, at Customers expense.
j. Maintain site drainage to prevent adverse effects to the OSSF.
k. Pay promptly and fully, all Contractors fees, Bills, or invoices as described herein.

X. **Access by Contractor**: Contractor is hereby granted and easement to the OSSF for the purpose of performing services described herein. Contractor may enter during Contractors normal work hours and /or any reasonable hour without prior notice to Customer to perform services and/or repairs described herein. Contractor shall have access to the OSSF electrical and physical components.

Tanks and treatment units shall be accessible by means of man ways, or risers and removable covers, for the purpose of evaluation as required by state and/or local rules or proprietary system manufacturer. If not an initial agreement (new installation) and the access is not in place or provided by Customer, the cost for the labor of excavation, and possible other labor and material costs will be required. These costs shall be billed to the Customer as an additional service at a rate of $75.00 per hour, plus materials at list price. Excavated soil shall be replaced as best as can at the time of service, and under no circumstances is the Contractor responsible for damages to sod, grass, roots, landscaping, or any un-marked underground items (telephone, television, electrical, cable, water, gas, etc) or for the uneven settling of soil.

XI. **Limit of Liability**: Contractor shall not be held liable for any incidental, consequential, special damages, economic loss due to expense, loss of profits or income, loss of use to Customer, whether in contract tort of any other theory. In no event shall Contractor be liable in an amount exceeding the total fee for services amount paid by Customer under this agreement.

XII . **Severability:** If any provision of the "Proposal and Contract" shall be held to be invalid or un-enforceable for any reason, the remaining provisions shall continue to be valid and enforceable. If a court finds that any provision of the "agreement" is invalid or un-enforceable, but that by limiting such provisions is would become valid and enforceable, then such provisions shall be deemed to be written, constructed and enforces as so limited.

XIII. Fee for services: The cost for this agreement is **$465.00** (Four hundred Sixty Five). This fee only involves the regularly scheduled required inspection service described herein section **V. Services.** The Fee does not include any equipment, material, labor necessary for non-warranty repairs, unscheduled inspections, or Customer requested visits to site.

Price Schedule for common (not covered) services:

Customer requested site visits (Call Outs)	***$100.00***
Site evaluation for existing OSSF (N/A if a service contract is initiated)	
Samples necessary for Regulatory authority compliance, not required by the STATE	
For all other services/repairs, the contractor will provide a cost estimate to the customer.	

XIV. **Payment:** Full amount due upon signature (required of new customers). Payment of invoices for any other service or repair provided by Contractor are due upon receipt of invoice.

XV. **Application or transfer of payment:** The fees paid for this agreement may transfer to the subsequent property owner; however this agreement is not transferable. Customer will advise subsequent property owner of the state requirement that they sign a replacement agreement authorizing Contractor to perform the herein described services, and accepting the Customers responsibilities. This replacement agreement must be signed and received in the Contractors office within ten (10) days of the date of transfer of property ownership. Contractor will apply all funds received from Customer, first to any past due obligations arising form this agreement including fees or charges for service or repairs. Any remaining monies will be applied to the funding of the replacement agreement. The consumption of funds in this manner may result in a reduction in the termination date of effective coverage per this agreement. See section IV.

XVI. **Entire agreement:** This agreement contains the entire Agreement of the parties, and there are no other conditions in any other agreement, oral or written.

Comal County Engineer's Office (CCEO)
Subject: Notice of Septic placement Permission

Regarding the Rebecca Creek Campgrounds at
3660 Tanglewood Trail
Spring Branch, TX 78070

To Whom It May Concern at Comal County Engineers Office,

The Rebecca Creek Campgrounds has permission to place its septic lines across any of Cypress Cove Water Supply's (CCWSC) easements as necessary.

Sincerely,

Angelyn Price
Administrative Office Manager

REVISED

SITE EVALUATION AND CALCULATIONS

Site Evaluation:

Soil Texture:	Clay loam
Soil Structure:	Blocky
Soil Depth:	18" minimum
Restrictive Horizon:	At 18” min. from surface
Groundwater:	None encountered
Topography:	More than 2% slope on drainfield area

Determination: Site was determined to have a Class III soil. Due to the park layout and rock horizon an aerobic treatment unit followed by drip irrigation shall be installed.

Calculations:

System # 5; the calculated flow based on water records is 195 gpd. The system shall be over designed to match the TCEQ designated flow of 280 gpd. Reference design 100-8497 for calculations and layout. Water saving devices are used throughout.

Q = 7 RV (40 gpd / RV)= **280 gpd**

An Aeris Aerobic 840 aerobic treatment system was installed. It has built in pre-treatment tank and pump tank. The aerobic unit shall be a drip irrigation system. (Reference the System Layout) Chlorinator is required for water entering pump tank. Liquid type chlorination shall be used.

Ra = **0.20 gal. / sq. ft. / day,** **(For a Class III soil)**

A = Q / Ra, **A** = (280 gal. / day) / (0.20 gal. / sq. ft. / day) = **1400 sq. ft.**

calculations continued on next page....

SITE EVALUATION AND CALCULATIONS

Calculations:

Emitter line shall be used which has emitters spaced at 2 foot intervals, and adjacent emitter lines shall also be spaced at 2 feet on center.

Required line length = A / 2 = (1400 sq. ft. / 2 sq. ft. per foot) = **700 feet**
700' of drip line shall be installed as shown on the System Layout

A 1" SCH 40 PVC supply line shall be used from the ATU systems pump tank to the drainfield. A 1" SCH 40 PVC return line from the drainfield back to the pump tank shall be provided. The system shall be set up in accordance with NuWater specifications. (Contact manufacturer for complete specifications and reference the System Layout and details)

NOTES FOR INSTALLER (if applicable):

Do not connect water softener back-wash to septic system.

The TCEQ allows washing machine water to be discharged into a separate gray water system unless the water contains human waste. Running this water out separate from the septic system can prolong the life of the system.

A Netafim 1" "Super Filter" 200 mesh/55 micron, shall be installed in a riser in the outlet line of the pump tank compartment.

Connect the 1" "Super Filter" and assemble in accordance with manufacturers specifications..

Contact NuWater dealer for complete specifications. All required specifications may not be contained in this design.

SITE EVALUATION AND CALCULATIONS

REVISED
9:01 am, Dec 12, 2022

The design pressure at the emitters is as specified by the manufacturer.

The total length of supply and return pipe is as shown on the System Layout

Diameter of supply and return lines is as shown on the System Layout.

NOTES TO OWNER OF SYSTEM:
MAINTENANCE AND MANAGEMENT PRACTICES (if applicable):

An OSSF should not be treated as if it were a normal city sewer system.

The excessive use of in-sink garbage grinders and grease discarding should be avoided.

Do not use the toilet to dispose of cleaning tissues, cigarette butts, or other trash.

Septic tanks shall be cleaned before sludge accumulates to a point where it approaches the bottom of the outlet device, to prevent solids from exiting the tank with the liquid.

Septic tanks should be cleaned every two-to-three years to prevent excessive sludge buildup.

Do not build driveways, storage buildings, or other structures over the treatment works or its disposal field.

Chemical additives or the so-called enzymes are not necessary for the operation of a septic tank. Some of these additives may be harmful to the tank's operation.

REVISED
9:01 am, Dec 12, 2022

SITE EVALUATION AND CALCULATIONS

Soaps, detergents, bleaches, drain cleaners, and other household cleaning materials will very seldom affect the operation of the system. However, moderation should be exercised in the use of such materials.

It is not advisable to allow water softener back flush to enter into any portion of the OSSF.

Except for Aerobic systems, the liquid from the OSSF is still heavily laden with bacteria. Contact with this liquid should be avoided, if it surfaces.

WATER CONSERVATION MEASURES (if applicable):

Showers usually use less water than baths. Install a water saving shower head that uses less than 2 1/2 gallons per minute and saves both water and energy.

If you take a tub bath, reduce the level of water in the tub from the level to which you customarily fill it.

Leaky faucets and faulty toilet fill-up mechanisms should be repaired as quickly as possible.

Check toilets for leaks that may not be apparent. Add a few drops of food coloring to the tank. Do not flush. If the color appears in the bowl within a few minutes, the toilet fill or ball-cock valve needs to be adjusted to prevent water from overflowing the stand pipe, or the flapper at the bottom of the toilet tank needs to be replaced.

Reduce the amount of water used for flushing the toilet by installing one of the following: a new toilet (1.6 gallon); a toilet tank dam; or filling and capping one-quart plastic bottles with water (usually one is all that will fit in smaller toilet tanks) and lowering them into the tank of the existing 3.5 gallon or larger toilet. Do not use bricks since they may crumble and cause damage to the fixture.

SITE EVALUATION AND CALCULATIONS

Try to run the dishwasher with a full load, whenever possible.

Avoid running the water continuously for brushing teeth, washing hands, rinsing kitchen utensils, or for cleaning vegetables.

Use faucet aerators that restrict flow to no more than 2.2 gallons per minute to reduce water consumption.

Keep a container of drinking water in the refrigerator instead of running the faucet until the water turns cool.

Insulate all hot water pipes to avoid long delays of wasted water while waiting for the heated water.

Ask your city, county, or local government about their programs to conserve water, and how they can help you save water.

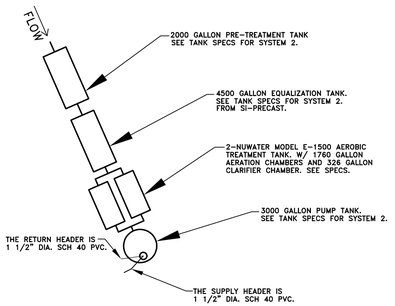
As a condition of this permit submittal, a meter must be installed on the outflow line of the pump tank. The readings from this meter must be recorded on a daily basis and submitted to the Comal County Environmental Health Department once a month for 12 months from the date the License to Operate is issued. If at any time the daily meter reading exceeds the permitted flow rate this permit will be void and a new permit must be obtained.

REVISED
9:10 am, Feb 14, 2023

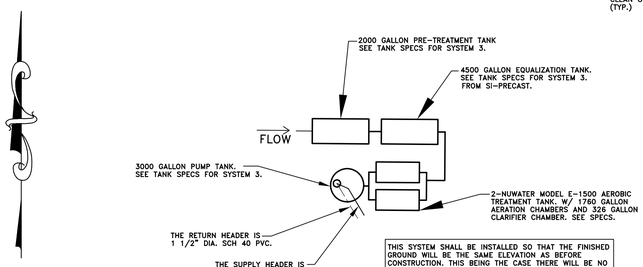
THE INSTALLATION OF THE 4 PROPOSED SEPTIC SYSTEMS WILL DISTURB LESS THAN 5 ACRES. THEREFORE PER 30 TAC 213.21, A CONTRIBUTING ZONE PLAN IS NOT REQUIRED FOR THIS ACTIVITY.

LEGEND:
10' UTILITIES EASEMENT
DRIP SUPPLY LINE
DRIP RETURN LINE
SOIL EVALUATION POINTS

THIS EXISTING SYSTEM #1 IS GRAND FATHERED IN, AS OF 9-28-21 REFERENCE EMAIL FROM ROBERT BOYD, P.E., COMAL COUNTY ASSISTANT ENGINEER.



EXPLODED VIEW OF SYSTEM 2



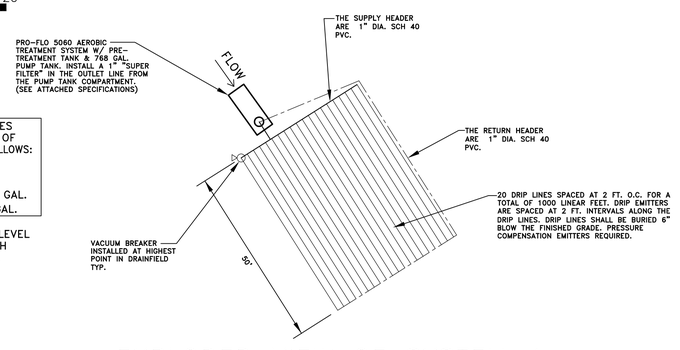
THIS SYSTEM SHALL BE INSTALLED SO THAT THE FINISHED GROUND WILL BE THE SAME ELEVATION AS BEFORE CONSTRUCTION. THIS BEING THE CASE THERE WILL BE NO RISE IN THE BASE FLOOD ELEVATION.

EXPLODED VIEW OF SYSTEM 3

SCALE: 1" = 60'

SYSTEM LAYOUT

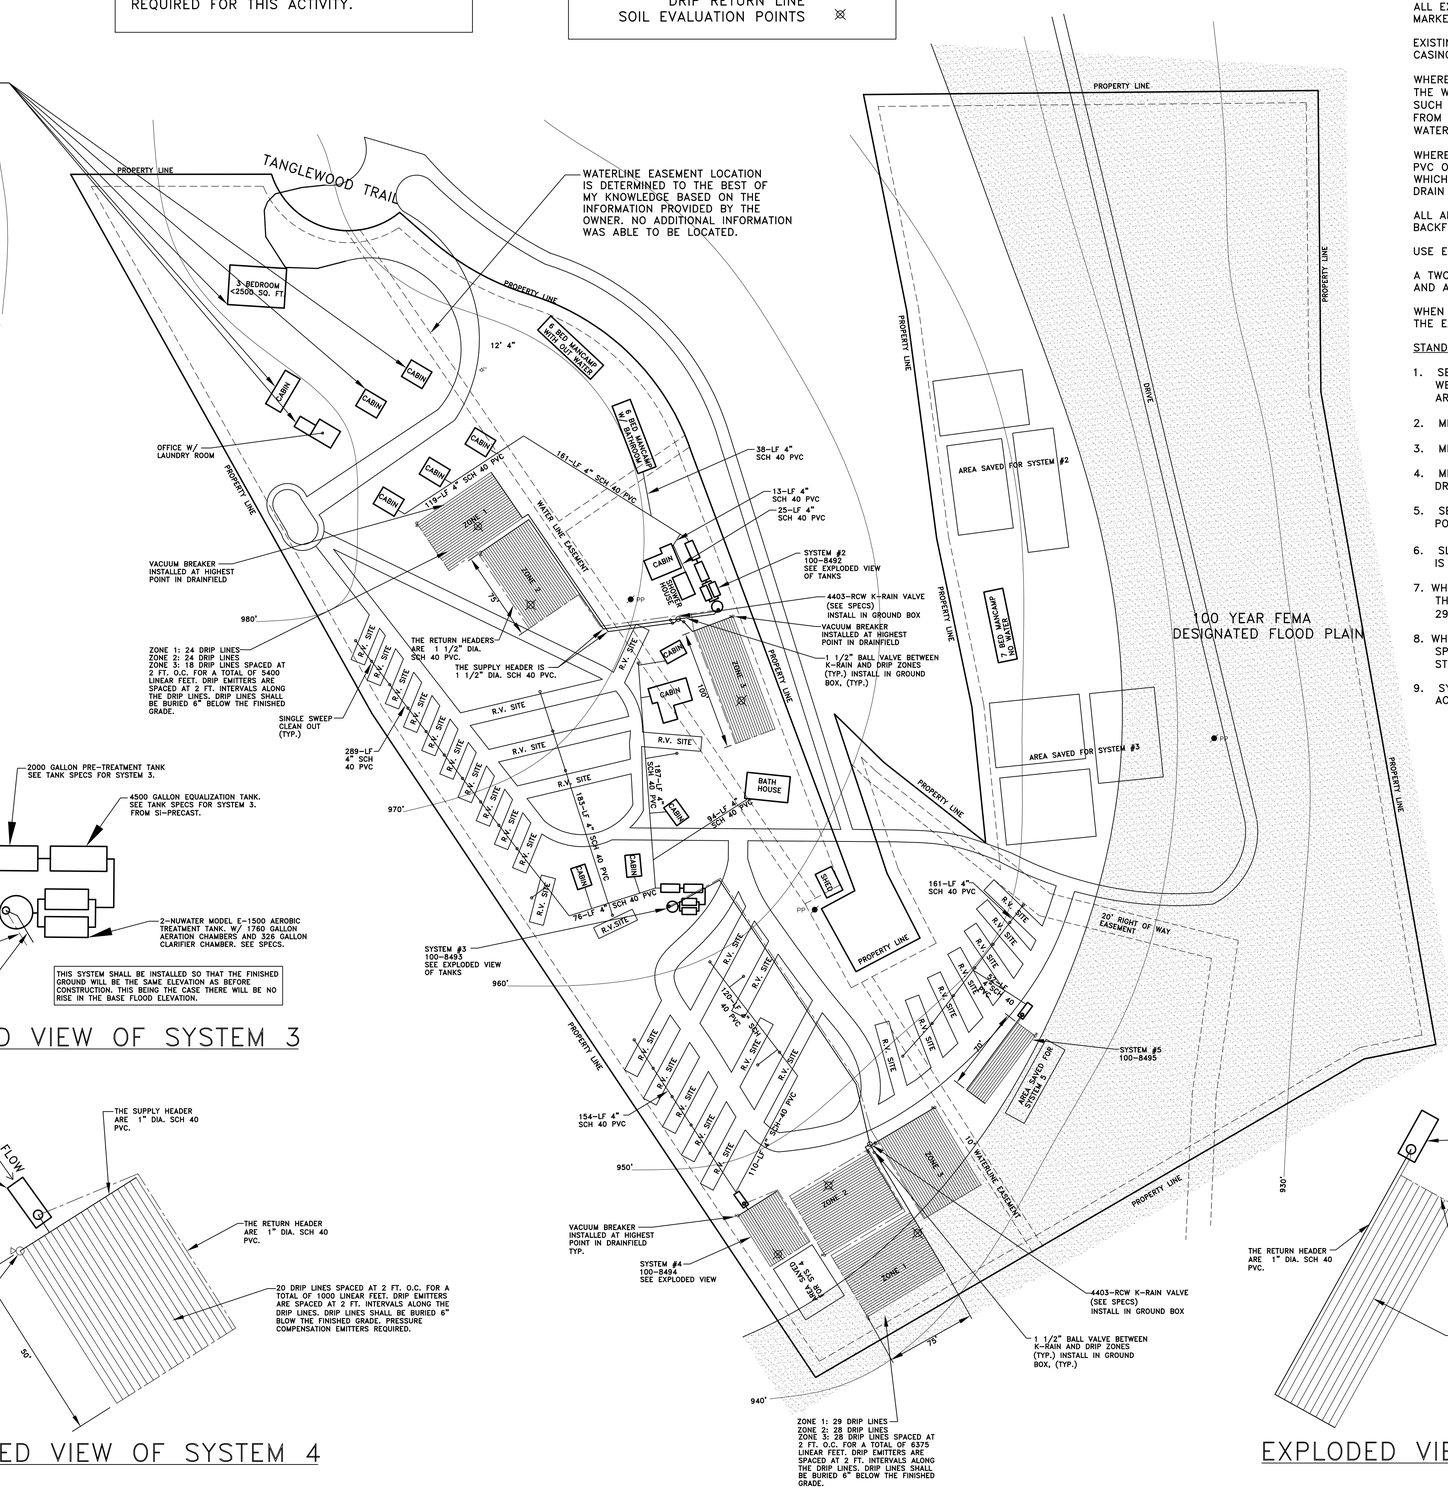
60 0 60 120

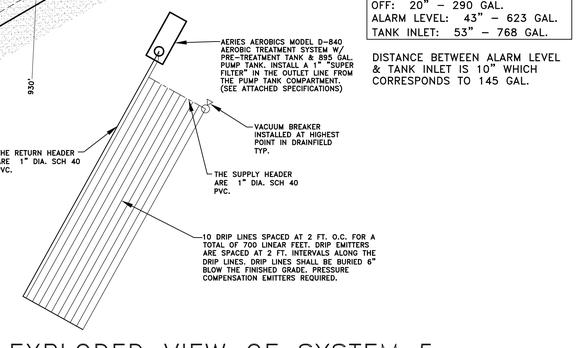


FLOAT SETTINGS & DISTANCES ABOVE THE INSIDE BOTTOM OF THE PUMP COMPT. ARE AS FOLLOWS:
ON: 18" – 260 GAL.
OFF: 17" – 246 GAL.
ALARM LEVEL: 43" – 693 GAL.
TANK INLET: 53" – 768 GAL.

DISTANCE BETWEEN ALARM LEVEL & TANK INLET IS 10" WHICH CORRESPONDS TO 145 GAL.

EXPLODED VIEW OF SYSTEM 4





FLOAT SETTINGS & DISTANCES ABOVE THE INSIDE BOTTOM OF THE PUMP COMPT. ARE AS FOLLOWS:

OFF: 20" – 290 GAL.
ALARM LEVEL: 43" – 623 GAL.
TANK INLET: 53" – 768 GAL.

DISTANCE BETWEEN ALARM LEVEL & TANK INLET IS 10" WHICH CORRESPONDS TO 145 GAL.

EXPLODED VIEW OF SYSTEM 5

SITE NOTES:

ALL EXISTING UNDERGROUND UTILITIES SHALL BE LOCATED AMD MARKED BEFORE ANY EXCAVATION BEGINS.

EXISTING WATER LINE LOCATIONS ARE UNDETERMINED. SEE WATER CASING NOTE AS REQUIRED.

WHERE A WATER LINE IS CLOSER THAN 10' TO A WASTEWATER MAIN, THE WATER LINE SHALL BE CASED INSIDE OF A SCH 40 PVC PIPE SUCH THAT THE ENDS OF THE CASING ARE AT LEAST. 10' AWAY FROM THE WASTEWATER MAIN. IN ADDITION, IF THE LINES CROSS, THE WATER LINE SHALL BE AT LEAST 6" ABOVE THE WASTEWATER MAIN.

WHERE DRAIN LINES PASS UNDER ROADWAYS, THEY SHALL BE SCH 80 PVC OR THEY SHALL BE SLEEVED INSIDE OF A SCH 40 PVC PIPE WHICH IS AT LEAST TWO NOMINAL PIPE SIZES LARGER THAN THE DRAIN LINE.

ALL ABANDONED SEPTIC TANKS SHALL BE LOCATED, PUMPED, BACKFILLED & CAVED-IN.

USE EXISTING SEWER LINES UNDER R.V. SITES WHERE POSSIBLE.

A TWO-WAY CLEAN OUT SHALL BE INSTALLED BETWEEN THE BUILDING AND AEROBIC TANKS.

WHEN CROSSING EASEMENT LINES, PERMISSION SHALL BE GRANTED BY THE EASEMENT HOLDER BEFORE ANY EXCAVATION BEGINS.

STANDARD NOTES:

1. SEPTIC TANK MUST BE A MINIMUM OF 50' FROM ANY WATER WELL. CLOSEST DISTANCE FROM ANY PART OF THE DRAINFIELD AREA TO A WATER WELL MUST BE 100' MINIMUM.
2. MINIMUM SETBACK OF SPRAY AREA FROM PROPERTY LINE IS 20'.
3. MINIMUM SETBACK OF DRIP AREA FROM PROPERTY LINE IS 5'.
4. MINIMUM SEPARATION DISTANCE BETWEEN SEPTIC TANK OR DRAINFIELD AREA AND WATER SUPPLY LINES IS 10'.
5. SETBACK OF SPRAY OR DRIP AREA FROM LAKES, STREAMS, PONDS, AND RIVERS IS 50' MINIMUM.
6. SLOPE OF INFLOW LINE TO TANK IS $\frac{1}{8}$ INCH PER FOOT RUN. PIPE IS 4" SCH 40 PVC.
7. WHERE PARALLEL SEWER AND NEW WATER LINES ARE CLOSER THAN 9' THE REQUIREMENTS SPECIFIED IN TCEQ, SUBCHAPTER D, 290.44(e)(4)(A) SHALL BE STRICTLY FOLLOWED.
8. WHERE SEWER AND NEW WATER LINES CROSS, THE REQUIREMENTS SPECIFIED IN TCEQ, SUBCHAPTER D, 290.44(e)(4)(B) SHALL BE STRICTLY FOLLOWED.
9. SYSTEM SHALL BE INSPECTED BY THE COUNTY INSPECTOR IN ACCORDANCE WITH CURRENT COUNTY INSPECTION PROCEDURES.

PER COUNTY REQUIREMENTS, A FLOW METER SHALL BE INSTALLED ON THE SUPPLY LINE AND RETURN LINE OF EACH AEROBIC UNIT FOLLOWED BY A DRIP IRRIGATION SYSTEM. FOR THE AEROBIC UNIT WITH SPRAY ONLY ONE METER SHALL BE INSTALLED ON THE SUPPLY LINE TO THE SPRINKLER. THE FLOW TO EACH SEPTIC SYSTEM SHALL BE METERED. EACH SYSTEM SHALL BE MONITORED, RECORDED & SUBMITTED TO COMAL COUNTY FOR ONE YEAR TO VERIFY NO MORE THAN THE PERMITTED FLOW IS USED FOR EACH SYSTEM.

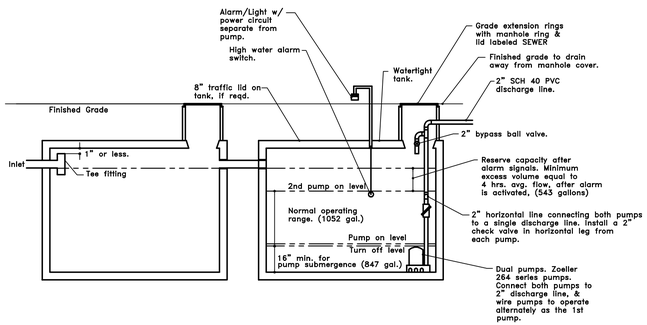
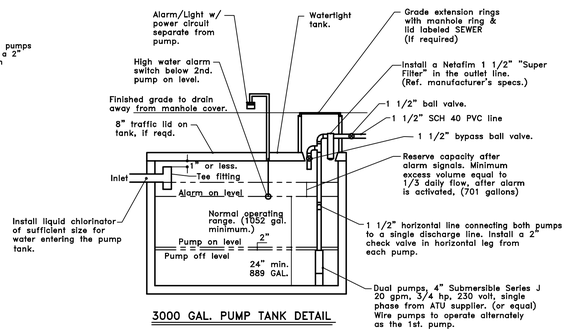
REVISED
10:28 am, Dec 16, 2022

SYSTEM #2 TANK SPECS:



2000 GAL. PRE-TREATMENT TANK & 4500 GALLON EQUALIZATION TANK

SET VALVES, FLOATS, AND TIMERS TO DELIVER A MAXIMUM OF 16 GAL./MIN., AND 61 GALLONS PER HOUR TO THE AEROBIC TREATMENT UNITS, TOTAL.



3000 GAL. PUMP TANK DETAIL

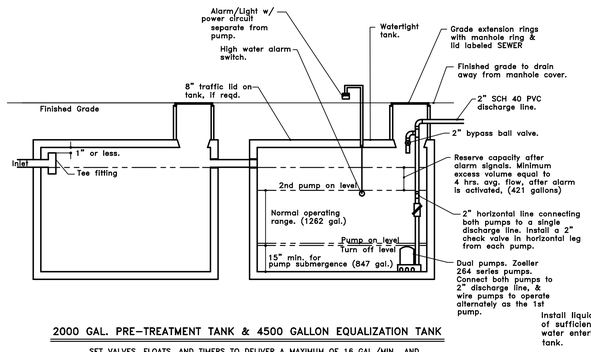
NOTES:

THE ALARM ON LEVEL SHALL BE BELOW THE 2ND PUMP ON LEVEL. THE ALARM SYSTEM SHALL HAVE A LOCK-ON FEATURE SO THAT ONCE IT IS ACTIVATED, IT WILL NOT GO OFF WHEN THE 2ND PUMP DRAWS THE LIQUID LEVEL BELOW THE ALARM ON LEVEL. BOTH AUDIO AND VISUAL ALARMS SHALL HAVE A MANUAL SILENCE SWITCH.

ALL ELECTRICAL WIRING SHALL BE IN ACCORDANCE WITH THE MOST RECENT EDITION OF THE NATIONAL ELECTRIC CODE. CONNECTIONS SHALL BE IN APPROVED JUNCTION BOXES AND ALL EXTERNAL POWER WIRING SHALL BE IN APPROVED ELECTRICAL CONDUIT, BURIED, AND TERMINATED AT A MAIN CIRCUIT BREAKER PANEL OR SUB-PANEL. ALL ELECTRICAL COMPONENTS SHOULD HAVE AN ELECTRICAL DISCONNECT WITHIN DIRECT VISION. ELECTRICAL DISCONNECTS MUST BE WEATHERPROOF (APPROVED FOR OUTDOOR USE) AND HAVE MAINTENANCE LOCKOUT PROVISIONS.

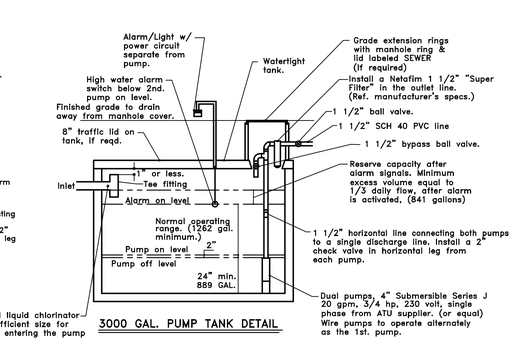
USE A LARGER TANK IF REQUIRED TO MEET MINIMUM STORAGE REQUIREMENTS.

SYSTEM #3 TANK SPECS:



2000 GAL. PRE-TREATMENT TANK & 4500 GALLON EQUALIZATION TANK

SET VALVES, FLOATS, AND TIMERS TO DELIVER A MAXIMUM OF 16 GAL./MIN., AND 74 GALLONS PER HOUR TO THE AEROBIC TREATMENT UNITS, TOTAL.



3000 GAL. PUMP TANK DETAIL

NOTES:

THE ALARM ON LEVEL SHALL BE BELOW THE 2ND PUMP ON LEVEL. THE ALARM SYSTEM SHALL HAVE A LOCK-ON FEATURE SO THAT ONCE IT IS ACTIVATED, IT WILL NOT GO OFF WHEN THE 2ND PUMP DRAWS THE LIQUID LEVEL BELOW THE ALARM ON LEVEL. BOTH AUDIO AND VISUAL ALARMS SHALL HAVE A MANUAL SILENCE SWITCH.

ALL ELECTRICAL WIRING SHALL BE IN ACCORDANCE WITH THE MOST RECENT EDITION OF THE NATIONAL ELECTRIC CODE. CONNECTIONS SHALL BE IN APPROVED JUNCTION BOXES AND ALL EXTERNAL POWER WIRING SHALL BE IN APPROVED ELECTRICAL CONDUIT, BURIED, AND TERMINATED AT A MAIN CIRCUIT BREAKER PANEL OR SUB-PANEL. ALL ELECTRICAL COMPONENTS SHOULD HAVE AN ELECTRICAL DISCONNECT WITHIN DIRECT VISION. ELECTRICAL DISCONNECTS MUST BE WEATHERPROOF (APPROVED FOR OUTDOOR USE) AND HAVE MAINTENANCE LOCKOUT PROVISIONS.

USE A LARGER TANK IF REQUIRED TO MEET MINIMUM STORAGE REQUIREMENTS.

CALCULATIONS TO DETERMINE PERMITTED FLOW FOR COMAL COUNTY:

THE PERMITTED FLOW FOR EACH SYSTEM IS BASED ON WATER RECORDS PROVIDED BY THE OWNER OVER AN ENTIRE YEAR. THE TCEQ DAILY FLOW FOR THE PARK SHALL BE USED TO SIZE EACH SYSTEM. A DIRECT RATIO WILL BE USED TO DETERMINE HOW THAT WATER IS DISTRIBUTED THROUGHOUT THE PARK FOR THE PERMIT APPLICATIONS. SEE CALCULATIONS BELOW.

MAXIMUM DAILY DEMAND FROM FEBRUARY LODGE WATER (100510 GALLONS) AND APRIL CABINS WATER RECORDS (30480 GALLONS)

100510 GALLONS / 28 DAYS OF FEBRUARY = 3590 GPD
30480 GALLONS / 30 DAYS OF APRIL = 1016 GPD
$Q_{TOTAL-PARK-WATER-USAGE}$ = 4606 GPD

DIRECT RATIO EQUATION:

$$\frac{Q_{TCEQ-COMPONENT}}{Q_{TCEQ-TOTAL-PARK}} = \frac{Q_{COMPONENT}}{Q_{TOTAL-PARK-WATER-RECORDS}}$$

FOR SYSTEM 1 $Q_{TCEQ\ COMPONENT}$:

3 BEDROOM <2500 SQ. FT. Q = 240 GPD
OFFICE W/5 EMPLOYEES Q= 5 EMPLOYEES(4 GPD/ PERSON)=20 GPD
LAUNDRY ROOM W/ 4 WASHING MACHINES
Q= 4 WASHING MACHINES (200 GPD / MACHINE) = 800 GPD
3 CABINS (AS AN APARTMENT)
Q= 100 GPD/ CABIN (3 CABINS) = 300 GPD

$Q_{TCEQ\ COMPONENT}$ = 1360 GPD SYSTEM #1

FOR SYSTEM 2 $Q_{TCEQ\ COMPONENT}$:

4 CABINS (AS AN APARTMENT)
Q= 100 GPD/ CABIN (4 CABINS) = 400 GPD
6 BED MANCAMP WITH 1 COMMON BATHROOM (SIZED AS HOTEL ROOM)
Q = 60 GPD / BED (6 BEDS) = 360 GPD
SHOWER HOUSE Q = 1344 GPD (TOTAL BATH USAGE EQUALLY DIVIDED AMONGST BOTH SHOWER HOUSES. SEE CALCULATIONS FOR EXPLANATION)

$Q_{TCEQ\ COMPONENT}$ = 2104 GPD SYSTEM #2

FOR SYSTEM 3 $Q_{TCEQ\ COMPONENT}$:

Q = 17 RV (40 GPD / RV) = 680 GPD
5 CABINS (AS AN APARTMENT)
Q= 100 GPD/ CABIN (5 CABINS) = 500 GPD
BATH HOUSE Q = 1344 GPD (TOTAL BATH USAGE EQUALLY DIVIDED AMONGST BOTH SHOWER HOUSES. SEE CALCULATIONS FOR EXPLANATION)

$Q_{TCEQ\ COMPONENT}$ = 2524 GPD SYSTEM #3

FOR SYSTEM 4 $Q_{TCEQ\ COMPONENT}$:

9 RV SITES (40 GPD) = 360 GPD

$Q_{TCEQ\ COMPONENT}$ = 360 GPD SYSTEM #4

FOR SYSTEM 5 $Q_{TCEQ\ COMPONENT}$:

7 RV SITES (40 GPD) = 280 GPD

$Q_{TCEQ\ COMPONENT}$ = 280 GPD SYSTEM #5

FLOW FOR BATH HOUSE & SHOWER HOUSE:

USAGE FROM RV Q= 28 GPD/ RV (33 TOTAL RV) = 924 GPD
USAGE FROM CAMPSITES
Q = 25 CAMPSITES (2 PEOPLE/ SITE) (28 GPD / SHOWER) = 1400 GPD
USAGE FROM MANCAMPS
Q = 13 BEDS (28 GPD) = 364 GPD

Q TOTAL = 2688 GPD FOR BOTH BATHHOUSE & SHOWER HOUSE
FOR CONSERVATISM THIS IS MORE THAN THE RECOMMENDED TCEQ FLOW

TOTAL FLOW FOR ENITRE PARK PER TCEQ:

$Q_{TCEQ-TOTAL-COMPONENT}$=1360 GPD + 2104 GPD + 2524 GPD + 360 GPD + 280 GPD= 6628 GPD

DIRECT RATIO FOR SYSTEM 1 $Q_{COMPONENT}$:

$$\frac{1360\ GPD\ TCEQ\ COMPONENT}{6628\ TCEQ\ TOTAL} = \frac{Q\ COMPONENT}{4606\ TOTAL\ PARK\ WATER\ RECORDS}$$

Q PERMITTED COMPONENT = 946 GPD FOR SYSTEM #1

DIRECT RATIO FOR SYSTEM 2 $Q_{COMPONENT}$:

$$\frac{2104\ GPD\ TCEQ\ COMPONENT}{6628\ TCEQ\ TOTAL} = \frac{Q\ COMPONENT}{4606\ TOTAL\ PARK\ WATER\ RECORDS}$$

Q PERMITTED COMPONENT = 1463 GPD FOR SYSTEM #2

DIRECT RATIO FOR SYSTEM 3 $Q_{COMPONENT}$:

$$\frac{2524\ GPD\ TCEQ\ COMPONENT}{6628\ TCEQ\ TOTAL} = \frac{Q\ COMPONENT}{4606\ TOTAL\ PARK\ WATER\ RECORDS}$$

Q PERMITTED COMPONENT = 1755 GPD FOR SYSTEM #3

DIRECT RATIO FOR SYSTEM 4 $Q_{COMPONENT}$:

$$\frac{360\ GPD\ TCEQ\ COMPONENT}{6628\ TCEQ\ TOTAL} = \frac{Q\ COMPONENT}{4606\ TOTAL\ PARK\ WATER\ RECORDS}$$

Q PERMITTED COMPONENT = 251 GPD FOR SYSTEM #4

DIRECT RATIO FOR SYSTEM 5 $Q_{COMPONENT}$:

$$\frac{280\ GPD\ TCEQ\ COMPONENT}{6628\ TCEQ\ TOTAL} = \frac{Q\ COMPONENT}{4606\ TOTAL\ PARK\ WATER\ RECORDS}$$

Q PERMITTED COMPONENT = 195 GPD FOR SYSTEM #5

PRO*PLUS*™ GEAR DRIVEN SPRINKLER SETTING INSTRUCTIONS

REVISED
10:32 am, Apr 07, 2022

SPRINKLER INSTALLATION

1 ▶ INSTALL AND BURY

Do not use pipe dope. Thread the sprinkler on the pipe. Bury the sprinkler flush to grade. **NOTE:** Gear driven sprinklers and pop-up sprays should not be installed on the same watering zone.

2 ▶ INSPECTING THE FILTER

Unscrew the top and lift the complete sprinkler assembly out of the housing can. The filter is located on the bottom of the sprinkler assembly and can easily be pulled out, cleaned and re-installed.

3 ▶ WINTERIZATION TIPS

When using an air compressor to remove water from the system please note the following:

1) Do not exceed 30 PSI.
2) Always introduce air into the system gradually to avoid air pressure surges. Sudden release of compressed air into the sprinkler can cause damage.
3) Each zone should run no longer than 1 minute on air. Sprinklers turn 10 to 12 times faster on air than on water. Over spinning rotors on air can cause damage to the internal components.

Boyd, Robert

From: Donna Cosper <donna.cosper@tceq.texas.gov>
Sent: Wednesday, February 23, 2022 1:28 PM
To: Boyd, Robert
Subject: RE: Wastewater Flow vs. Treatment

Hi Robert,

Yes, your summary is correct. They must not go over the permitted daily flow. As we discussed, the generated flow might be more as long as the flow is equalized so that 5000 gpd or less is treated.

On the STR issue, I have not gotten legal's opinion. I know you no longer need their opinion for the case that generated the request but I want to get their take on it and will let you know as soon as I do.

Regards,

Donna Cosper, P.E., M.S.S.E.
Texas Commission on Environmental Quality
Program Support and Environmental Assistance Division
On-Site Sewage Facility Program

To: 'Donna Cosper' <donna.cosper@tceq.texas.gov>
Subject: Wastewater Flow vs. Treatment

Donna,

Thanks for your time on the phone. From our conversation, we understood that we could not issue a permit with a wastewater flowrate greater than 5,000 GPD. However, we could issue a permit that can treat more than 5,000 GPD as long as the permitted flow rate is less than 5,000 GPD. In this scenario, we would also require flow meters on the outflow of the treatment units demonstrating that the development is staying within the permitted flow rate. If the development went above the permitted flow rate or went over 5,000 GPD, it would trigger a violation that could only be resolved by getting a permit from the state.

Is this a correct summary of our discussion?

Thanks.

Robert Boyd, P.E.

RE: 14.23 acres out of the Charles Murhardt Survey, Abstract 404/ 3660 Tanglewood Trail.

Property Owner & Agent,

We received planning materials for the referenced permit application on 11/16/21 and found those planning materials to be deficient. In order to continue processing this permit, we need the following:

1. The site map is not legible. Please provide a digital copy of the site map so we can verify accordingly. (see attached)
2. Revise accordingly and resubmit.

If you have any questions, you can email me or call the office.

Thank you,

COMAL COUNTY TEXAS

Wesley A. Magley

APPLICATION FOR PERMIT FOR AUTHORIZATION TO CONSTRUCT AN ON-SITE SEWAGE FACILITY AND LICENSE TO OPERATE

System #5

Planning Materials & Site Evaluation as Required Completed By Kaeleigh Crandall

System Description aerobic w/ surface spray application

Size of Septic System Required Based on Planning Materials & Soil Evaluation

Tank Size(s) (Gallons) 800 gal ATU Absorption/Application Area (Sq Ft) 2604 ft²

Gallons Per Day (As Per TCEQ Table III) 1167 gpd

(Sites generating more than 5000 gallons per day are required to obtain a permit through TCEQ.)

VOID

Is the property located over the Edwards Recharge Zone? ☐ Yes ☒ No

(If yes, the planning materials must be completed by a Registered Sanitarian (R.S.) or Professional Engineer (P.E.))

Is there an existing TCEQ approved WPAP for the property? ☐ Yes ☒ No

(If yes, the R.S. or P.E. shall certify that the OSSF design complies with all provisions of the existing WPAP.)

If there is no existing WPAP, does the proposed development activity require a TCEQ approved WPAP? ☐ Yes ☒ No

(If yes, the R.S. or P.E. shall certify that the OSSF design will comply with all provisions of the proposed WPAP. A Permit to Construct will not be issued for the proposed OSSF until the proposed WPAP has been approved by the appropriate regional office.)

Is the property located over the Edwards Contributing Zone? ☒ Yes ☐ No

Is there an existing TCEQ approval CZP for the property? ☐ Yes ☒ No

(If yes, the P.E. or R.S. shall certify that the OSSF design complies with all provisions of the existing CZP.)

If there is no existing CZP, does the proposed development activity require a TCEQ approved CZP? ☐ Yes ☒ No

(If yes, the R.S. or P.E. shall certify that the OSSF design will comply with all provisions of the proposed CZP. A Permit to Construct will not be issued for the proposed OSSF until the CZP has been approved by the appropriate regional office.)

Is this property within an incorporated city? ☐ Yes ☒ No

If yes, indicate the city: _____

By signing this application, I certify that:

- The information provided above is true and correct to the best of my knowledge.
- I affirmatively consent to the online posting/public release of my e-mail address associated with this permit application, as applicable.

SITE EVALUATION AND CALCULATIONS

Site Evaluation:

Soil Texture:	Clay loam
Soil Structure:	Blocky
Soil Depth:	0" to 18"
Restrictive Horizon:	Rock horizon from 0" to 18" below surface
Groundwater:	None encountered
Topography:	Less 2% slope at spray areas

Determination: Site was determined to have a Class III soil with no groundwater encountered. Due to the rock over the drainfield area an aerobic treatment unit followed by spray irrigation will be installed. The spray area will be controlled by a commercial irrigation timer.

VOID

Calculations:

System # 5 is designed for total flow 167 gpd. Reference design 100-8196 for calculations and layout. Water saving devices are used throughout.

Q = 167 gpd

A Nu-Water Model B-800 aerobic treatment system, or equal, shall be installed. It has built in pre-treatment tank and pump tank. The aerobic unit shall be followed a spray irrigation system. (Reference the System Layout) Chlorinator is required for water entering pump tank. Liquid type chlorination shall be used.

Ri = 0.064 gal. / sq. ft. / day, **(For location in Comal County)**

Required Area:

A = Q / Ri, A = (445 gal. / day) / (0.064 gal. / sq. ft. / day) = **2609 sq. ft.**

SITE EVALUATION AND CALCULATIONS

Calculations:

Install 1 sprinkler. The sprinkler is a Hunter low angle type, with nozzle and spray radius as shown on the System Layout. See System Layout for spray pattern.

Proposed total area = **2827 sq. ft.**

Overlap and masked area: **0 sq. ft.**

Actual covered area = 2827 sq. ft. (Covered area is greater than required area)

A 1" ball valve will be installed just downstream of the pump either inside of or outside of the pump tank compartment. The ball valve shall be used to adjust the spray radius(radii) of the sprinkler(s) to the value(s) shown on the System Layout. (Reference the attached data for pump curves and nozzle data.)

NOTES FOR INSTALLER (if applicable):

Do not connect water softener back-wash to septic system.

The TCEQ allows washing machine water to be discharged without treatment into a separate gray water system, unlike toilet water containing human waste. Running this water out separate from the septic system can prolong the life of the system.

Areas where tanks and drainfields / spray areas are located shall be built-up or drained so that no ponding of water occurs in these areas.

The design application rate is 0.059 gallons / sq. ft. / day

Dosing cycle quantity is 167 gallons, average. Use a commercial irrigation timer.

The number of dosing cycles per day is one (1).

SITE EVALUATION AND CALCULATIONS

The design pressure at each sprinkler head is 30 to 40 psig.

The total length of supply pipe is as shown on the System Layout

Means of preventing siphoning is an anti-siphon valve.

Diameter of supply line is as shown on the System Layout.

Flow control valve is required downstream of the pump.

NOTES TO OWNER OF SYSTEM:
MAINTENANCE AND MANAGEMENT PRACTICES (if applicable):

An OSSF should not be treated as if it were a normal city sewer system.

The excessive use of in-sink garbage grinders and grease discarding should be avoided.

Do not use the toilet to dispose of sanitary napkins, cigarette butts, or other trash.

Septic tanks shall be cleaned before sludge accumulates to a point where it approaches the bottom of the outlet device, to prevent solids from exiting the tank with the liquid.

Septic tanks should be cleaned every two-to-three years to prevent excessive sludge buildup.

Do not build driveways, storage buildings, or other structures over the treatment works or its disposal field.

Chemical additives or the so-called enzymes are not necessary for the operation of a septic tank. Some of these additives may be harmful to the tank's operation.

SITE EVALUATION AND CALCULATIONS

Soaps, detergents, bleaches, drain cleaners, and other household cleaning materials will very seldom affect the operation of the system. However, moderation should be exercised in the use of such materials.

It is not advisable to allow water softener back flush to enter into any portion of the OSSF.

Except for Aerobic systems, the liquid from the OSSF is still heavily laden with bacteria. Contact with this liquid should be avoided, if it surfaces.

WATER CONSERVATION MEASURES (if applicable):

Showers usually use less water than baths. Install a water saving shower head that uses less than 2 1/2 gallons per minute and saves both water and energy.

If you take a tub bath, reduce the level of water in the tub from the level to which you customarily fill it.

Leaky faucets and faulty toilet fill-up mechanisms should be repaired as quickly as possible.

VOID

Check toilets for leaks that may not be apparent. Add a few drops of food coloring to the tank. Do not flush. If the color appears in the bowl within a few minutes, the toilet fill or ball-cock valve needs to be adjusted to prevent water from overflowing the stand pipe, or the flapper at the bottom of the toilet tank needs to be replaced.

Reduce the amount of water used for flushing the toilet by installing one of the following: a new toilet (1.6 gallon); a toilet tank dam; or filling and capping one-quart plastic bottles with water (usually one is all that will fit in smaller toilet tanks) and lowering them into the tank of the existing 3.5 gallon or larger toilet. Do not use bricks since they may crumble and cause damage to the fixture.

SITE EVALUATION AND CALCULATIONS

Try to run the dishwasher with a full load, whenever possible.

Avoid running the water continuously for brushing teeth, washing hands, rinsing kitchen utensils, or for cleaning vegetables.

Use faucet aerators that restrict flow to no more than 2.2 gallons per minute to reduce water consumption.

Keep a container of drinking water in the refrigerator instead of running the faucet until the water turns cool.

Insulate all hot water pipes to avoid long periods of standing water while waiting for the heated water.

Ask your city, county, or local government about their programs to conserve water, and how they can help you save water.

THE INSTALLATION OF THE 4 PROPOSED SEPTIC SYSTEMS WILL DISTURB LESS THAN 5 ACRES. THEREFORE PER 30 TAC 213.21, A CONTRIBUTING ZONE PLAN IS NOT REQUIRED FOR THIS ACTIVITY.

LEGEND:
- 10' UTILITIES EASEMENT
- DRIP SUPPLY LINE
- DRIP RETURN LINE
- SOIL EVALUATION POINTS

MANGOLD ENGINEERING COMPANY WILL NOT BE RESPONSIBLE FOR THE CONSEQUENCES OF THE USE OF ANY PART OF THE ENGINEERING OF THIS SEPTIC SYSTEM BEFORE THE ENGINEERING HAS BEEN COMPLETELY AND FINALLY APPROVED BY THE APPROPRIATE COUNTY AUTHORITY IN THE COUNTY FOR WHICH IT IS INTENDED. IF TEST HOLES WERE NOT PRESENT DURING THE SITE-EVALUATION, THE OWNER/INSTALLER SHALL BE RESPONSIBLE FOR DIGGING TEST HOLES AND CONTACTING MANGOLD ENGINEERING COMPANY PRIOR TO ANY USE OF THIS ENGINEERING DESIGN.

SITE NOTES:

ALL EXISTING UNDERGROUND UTILITIES SHALL BE LOCATED AMD MARKED BEFORE ANY EXCAVATION BEGINS.

EXISTING WATER LINE LOCATIONS ARE UNDETERMINED. SEE WATER CASING NOTE AS REQUIRED.

WHERE A WATER LINE IS CLOSER THAN 10' TO A WASTEWATER MAIN, THE WATER LINE SHALL BE CASED INSIDE OF A SCH 40 PVC PIPE SUCH THAT THE ENDS OF THE CASING ARE AT LEAST. 10' AWAY FROM THE WASTEWATER MAIN. IN ADDITION, IF THE LINES CROSS, THE WATER LINE SHALL BE AT LEAST 6" ABOVE THE WASTEWATER MAIN.

WHERE DRAIN LINES PASS UNDER ROADWAYS, THEY SHALL BE SCH 80 PVC OR THEY SHALL BE SLEEVED INSIDE OF A SCH 40 PVC PIPE WHICH IS AT LEAST TWO NOMINAL PIPE SIZES LARGER THAN THE DRAIN LINE.

ALL ABANDONED SEPTIC TANKS SHALL BE LOCATED, PUMPED, BACKFILLED & CAVED-IN.

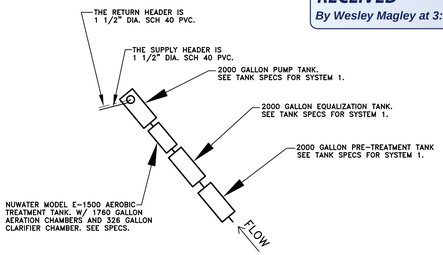
USE EXISTING SEWER LINES UNDER R.V. SITES WHERE POSSIBLE.

A TWO-WAY CLEAN OUT SHALL BE INSTALLED BETWEEN THE BUILDING AND AEROBIC TANKS.

WHEN CROSSING EASEMENT LINES, PERMISSION SHALL BE GRANTED BY THE EASEMENT HOLDER BEFORE ANY EXCAVATION BEGINS.

STANDARD NOTES:

1. SEPTIC TANK MUST BE A MINIMUM OF 50' FROM ANY WATER WELL. CLOSEST DISTANCE FROM ANY PART OF THE DRAINFIELD AREA TO A WATER WELL MUST BE 100' MINIMUM.
2. MINIMUM SETBACK OF SPRAY AREA FROM PROPERTY LINE IS 20'.
3. MINIMUM SETBACK OF DRIP AREA FROM PROPERTY LINE IS 5'.
4. MINIMUM SEPARATION DISTANCE BETWEEN SEPTIC TANK OR DRAINFIELD AREA AND WATER SUPPLY LINES IS 10'.
5. SETBACK OF SPRAY OR DRIP AREA FROM LAKES, STREAMS, PONDS, AND RIVERS IS 50' MINIMUM.
6. SLOPE OF INFLOW LINE TO TANK IS $\frac{1}{8}$ INCH PER FOOT RUN. PIPE IS 4" SCH 40 PVC.
7. SYSTEM SHALL BE INSPECTED BY THE COUNTY INSPECTOR IN ACCORDANCE WITH CURRENT COUNTY INSPECTION PROCEDURES.



EXPLODED VIEW OF SYSTEM 1

THIS EXISTING SYSTEM IS GRANDFATHERED IN, AS OF 9-28-21 REFERENCE EMAIL FROM ROBERT BOYD, P.E., COMAL COUNTY ASSISTANT ENGINEER. SYSTEM #1 IS PROPOSED FOR FUTURE REFERENCE ONLY. THIS SYSTEM SHALL BE PERMITTED BEFORE ANY CONSTRUCTION BEGINS.

Supplemental Calculations

SUPPLEMENTAL CALCULATIONS FOR DESIGN 100-8196

THE FLOW FOR EACH SYSTEM IS BASED ON WATER RECORDS PROVIDED BY THE OWNER OVER AN ENTIRE YEAR. THE MAXIMUM DAILY FLOW FOR THE PARK SHALL BE USED. A DIRECT RATIO WILL BE USED TO DETERMINE HOW THAT WATER IS DISTRIBUTED THROUGHOUT THE PARK. SEE CALCULATIONS BELOW.

MAXIMUM DAILY DEMAND FROM FEBRUARY LODGE WATER (100510 GALLONS) AND APRIL CABINS WATER RECORDS (30480 GALLONS)

100510 GALLONS / 28 DAYS OF FEBRUARY = 3590 GPD
30480 GALLONS / 30 DAYS OF APRIL = 1016 GPD
$Q_{TOTAL-PARK-WATER-USAGE}$ = 4606 GPD

DIRECT RATIO EQUATION:

$$\frac{Q_{TCEQ-COMPONENT}}{Q_{TCEQ-TOTAL-PARK}} = \frac{Q_{COMPONENT}}{Q_{TOTAL-PARK-WATER-RECORDS}}$$

3 BEDROOM <2500 SQ. FT. Q= 2 GPD
OFFICE W/5 EMPLOYEES Q= 5 EMPLOYEES(4 GPD/ PERSON)=2 GPD
LAUNDRY ROOM W/ 4 WASHING MACHINES
Q= 4 WASHING MACHINES (200 GPD/ MACHINE) = GPD
3 CABINS (AS AN APARTMENT)
Q= 100 GPD/ CABIN (3 CABINS) = 300 GPD

$Q_{TCEQ\ COMPONENT}$ = 1360 GPD SYSTEM #1

FOR SYSTEM 2 $Q_{TCEQ\ COMPONENT}$:

4 CABINS (AS AN APARTMENT)
Q= 100 GPD/ CABIN (4 CABINS) = 400 GPD
6 BED MANCAMP WITH 1 COMMON BATHROOM (SIZED AS HOTEL ROOM)
Q = 60 GPD / BED (6 BEDS) = 360 GPD
SHOWER HOUSE Q = 1344 GPD (TOTAL BATH USAGE EQUALLY DIVIDED AMONGST BOTH SHOWER HOUSES. SEE CALCULATIONS FOR EXPLANATION)

$Q_{TCEQ\ COMPONENT}$ = 2104 GPD SYSTEM #2

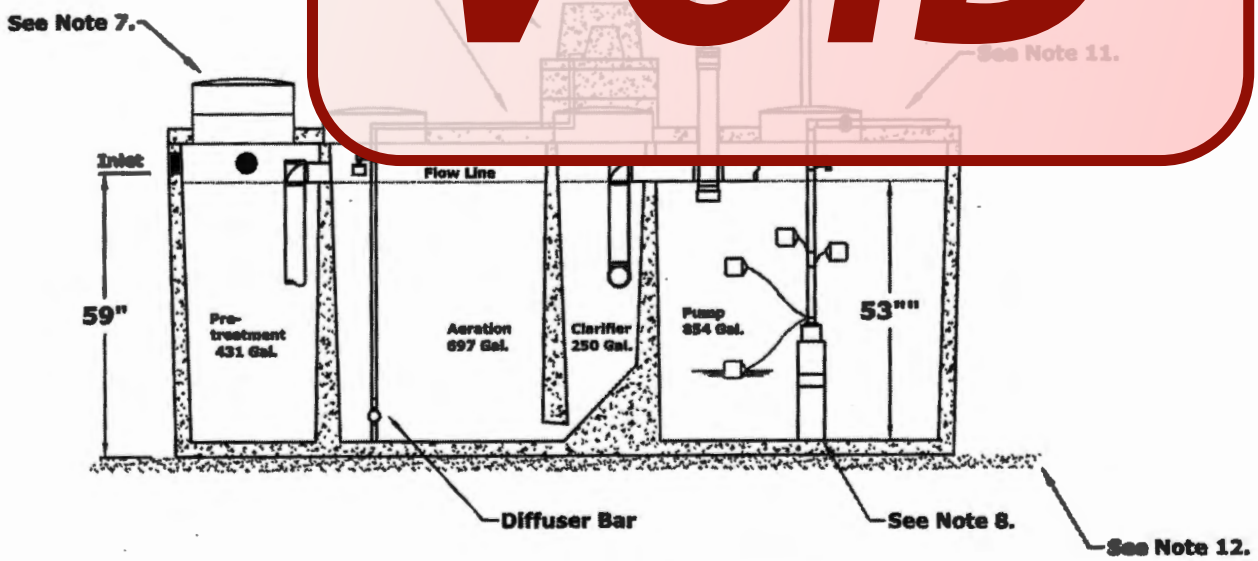
Assembly Details

OSSF

DIMENSIONS:
Outside Height: 67"
Outside Width: 75"
Outside Length: 164.5"

MINIMUM EXCAVATION DIMENSIONS:
Width: 87"
Length: 177"



GENERAL NOTES:

1. Plant structure material to be precast concrete and steel.
2. Maximum burial depth is 30" from slab top to grade.
3. Weight = 16,700 lbs.
4. Treatment capacity is 800 GPD. Pump compartment set-up for a 420 GPD Flow Rate (5 beedroom, < 4,501 sq/ft living aera). Please specify for additional set-up requirements. BOD Loading = 2.60 lbs. per day.
5. Standard tablet chlorinator or Optional Liquid chlorinator. NSF approved chlorinators (tablet & liquid) available.
6. Bio-Robix B-800 Control Center w/ Timer for night spray application. Optional Micro Dose (min/sec)timer available for drip applications. Electrical Requirement to be 115 Volt, 60 Hz, Single Phase, 30 AMP, Grounded Receptacle.
7. 20" Ø access riser w/ lid (Typical 4). Optional extension risers available.
8. 20 GPM 1 1/2 HP, high head effluent pump.
9. HIBLOW Air Compressor w/ concrete housing.
10. 1/2" Sch. 40 PVC Air Line (Max. 50 Lft from Plant).
11. 1" Sch. 40 PVC pipe to distribution system provided by contractor.
12. 4" min. compacted sand or gravel pad by Contractor

COMPARE THESE FEATURES

- Non-Clogging Vortex Impeller Design.
- Float operated, submersible (NEMA 6) 2 pole switch.
- Durable cast iron construction. Cast iron switch cap, motor, and pump housing.
- Stainless steel screws, bolts, handle, guard, arm and seal assembly.
- Engineered, glass-filled, plastic impeller with metal insert.
- UL-listed 3-wire cord and plug, 15 ft. cord standard for automatic & nonautomatic.
- Corrosion resistant powder coated epoxy finish.
- Thermal overload protection.
- Oil filled PSC motor - hermetically sealed.
- Engineered plastic base.
- .4 H.P. 115V & 230V, 1Ph., 60 cycle, 1725 RPM.
- Carbon and ceramic shaft seal.
- Oil Lubricated Bearings.
- Passes 2-inch spherical solids.
- 2" NPT Discharge.
- On point - 12½"
- Off point - 4½"

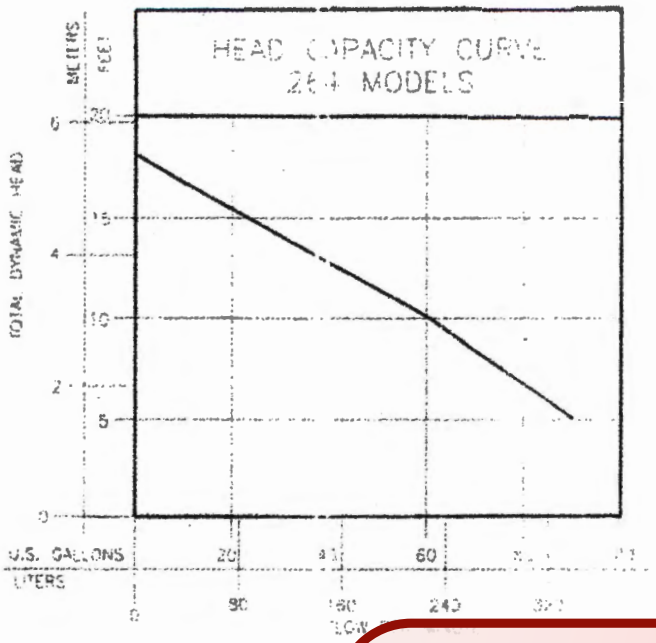
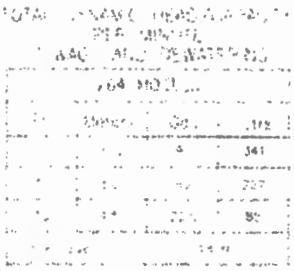
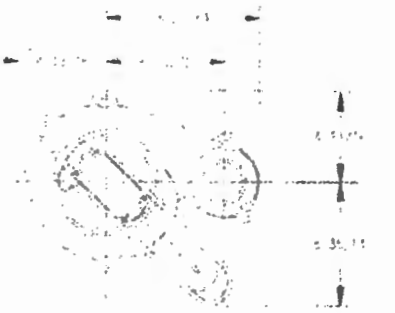
MODELS AVAILABLE

- Automatic
- Nonautomatic (for variable level systems)
- BE & BN264 available packaged with Piggyback variable level float switch.

*May be used in those states where codes do not restrict solids size in effluent systems.







- Electrical alternators for duplex systems available for variable level float switches.
- Minimum recommended basin size
  Simplex-18"x30"
  Duplex-30"x30"
- Standard Automatic - Weight 39 lbs. .4 H.P.

For over 130° F. (54° C.) special quotation required.

SELECTION GUIDE

1. Integral float operated 2-pole mechanical switch, no external control required.
2. Single piggyback variable level float switch, or double piggyback variable level float switch. Refer to FM0477.
3. Mechanical alternator M-Pak 10-0072 or 10-0075.
4. See FM0712 for correct model of electrical alternator.
5. Control switch 10-0225 used as a control activator specify duplex (3) or (4) float system.

For information on additional Zoeller products refer to catalog on Piggyback Variable Level Float Switches FM0477, Electrical Alternator, FM0486; Mechanical Alternator, FM0495; Sump/Sewage Basins, FM0487, and Single Phase Simplex Pump Control, FM1598; Alarm System, FM0711.

⚠ CAUTION

All installation of controls, protection devices and wiring should be done by a qualified licensed electrician. All electrical and safety codes should be followed including the most recent National Electric Code (NEC) and the Occupational Safety and Health Act (OSHA).

RESERVE POWERED DESIGN

For unusual conditions a reserve safety factor is engineered into the design of every Zoeller pump.

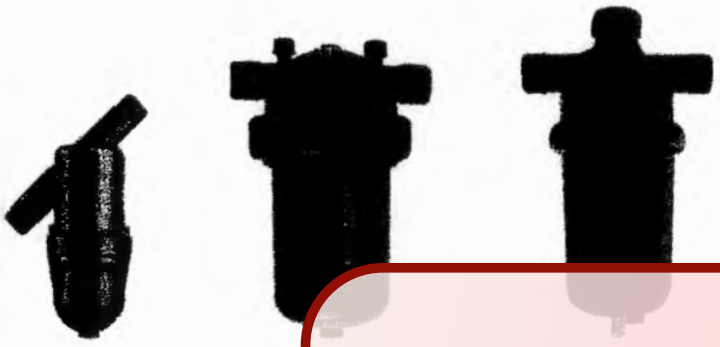
NETAFIM™
GROW MORE WITH LESS

MANUAL DISC FILTERS

RELIABLE, EFFICIENT PLASTIC DISCS CREATE SUPERIOR FILTRATION



3/4"

THE FILTERING PROCESS

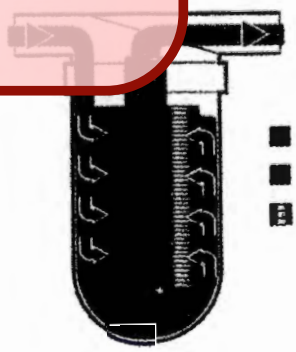
Grooved, compressed plastic disc rings produce a deep filtration process. As dirty water is pumped into the filter and pressure increases on the outside of the filter, the water pressure compresses the rings together tightly.

Grooves in the disc rings crisscross, forming a three dimensional network that traps particles. The number of crisscrossed intersection points on each groove varies, depending on filtration grade. The turbulance in the varying paths and the large number of intersections create an environment where particles are eventually trapped.

This design filters the dirty water thoroughly, not only on the outer surface of the cylindrical disc filter, but through the entire depth of every ring's groove. The result is a larger, more efficient filtering surface (when compared to screen filters) with more debris being captured and cleaner water flowing from the filter.

PRODUCT ADVANTAGES

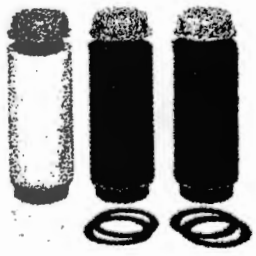
- Highly effective multiple disc design and holds more debris
- Greater holding capacity of the rings vs. screen filters mean less frequent cleaning
- Rings are easily removed for fast cleaning without the need for scrubbing
- Color-coded disc rings make identification of mesh rating fast and easy



- Dirty Water
- Filtered Water
- Disc Rings

APPLICATIONS

- Primary irrigation filter for relatively clean or average water quality
- Protection of irrigation systems from clogging and/or abrasion



MESH/MICRON		
MESH	MICRON	DISC COLOR
040	400	Blue
080	200	Yellow

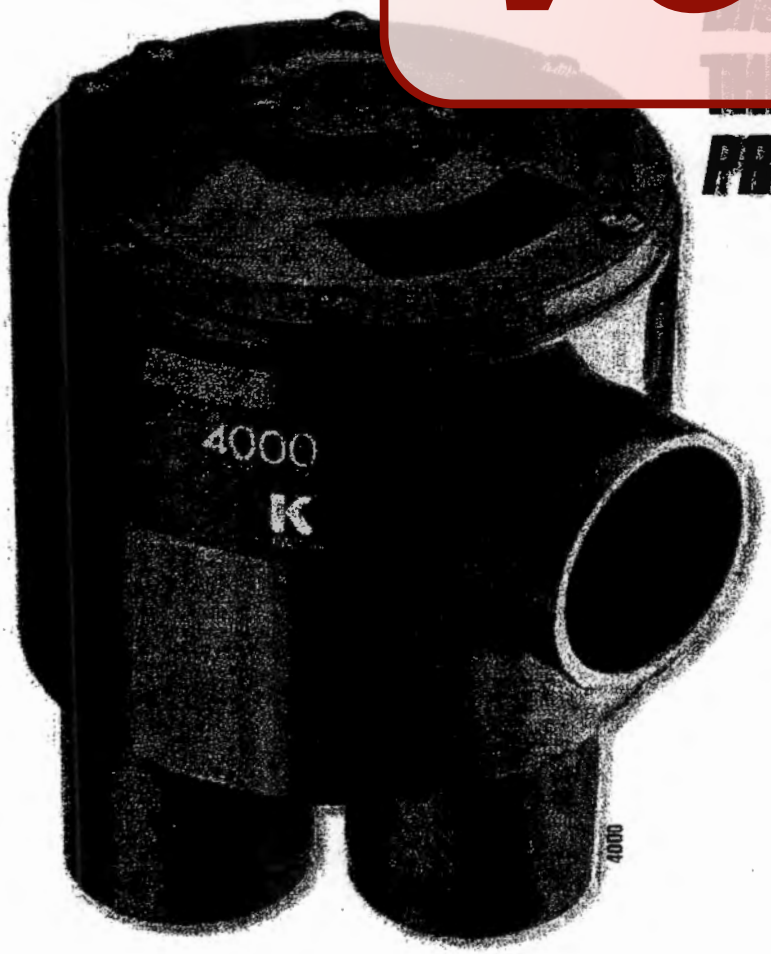
PROFESSIONAL PRODUCTS.



FEATURES/BENEFITS

- **2 Year Trade Warranty-** Factory support up to two years after purchase.
- **ABS Polymer Construction-** High-strength, non-corrosive body for long product life.
- **Available in 4 and 6 Outlet Models-** Can quickly and easily change from two to six watering zones.
- **Simplicity of Design-** Valves are easily maintained and serviced for long product life.
- **Operates at Low 10 GPM at Pressures of 25-75 PSI-** Reliably automates multiple zoned residential and small commercial irrigation or wastewater systems.

K RAIN.

IRRIGATION SOLUTIONS WORLDWIDE™

K-RAIN MODEL 4000: DISTRIBUTING VALVE

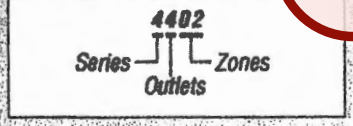
The 4000 distributing valve offers a reliable, economical way to automate multiple zoned residential and small commercial irrigation systems. The simplicity of design and a minimum of moving parts ensures ease of maintenance and long service life.

These patented valves allow for the number of watering zones to be changed quickly and easily. They are ideally suited for both city water and pump applications and may also be used for onsite wastewater or effluent water applications.

The 4000 valve is available in 4 or 6 outlet models. A quick change of the cam allows the valve to operate from 2 to 6 zones. The valve will operate with flows as low as 10 GPM and at pressures of 25 to 75 PSI.

The distributing valve shall carry a two-year trade warranty against manufacturing defects.

HOW TO SPECIFY



MODELS

4 Outlet - 1 1/4" x 1 1/4" Models

4400	No Cam
4402	Cammed for 2 Zone Operation
4403	Cammed for 3 Zone Operation
4404	Cammed for 4 Zone Operation

Other Options: Add to Part Number

RCW	Reclaimed Water Use

4 Outlet - 1" x 1" Models

4410	No Cam
4412	Cammed for 2
4413	Cammed for 3 Zone Operation
4414	Cammed for 4
4603	Cammed for 3 Zone Operation
	Zone Operation
4605	Cammed for 5 Zone Operation
4606	Cammed for 6 Zone Operation

Other Options: Add to Part Number

RCW	Reclaimed Water Use

6 Outlet - 1" x 1" Models

4610	No Cam
4612	Cammed for 2 Zone Operation
4613	Cammed for 3 Zone Operation
4614	Cammed for 4 Zone Operation
4615	Cammed for 5 Zone Operation
4616	Cammed for 6 Zone Operation

SPECIFICATIONS

- Constructed of High Strength, Non-Corrosive ABS Polymer
- Flow Range:
  4 Outlet Valve: 10-40 GPM
  6 Outlet Valve: 10-25 GPM
- Pressure Rating: 25 - 75 PSI
- Pressure Loss:

4 Outlet Valve

Flow (GPM)	10	20	30	40
PSI Loss	2.0	3.0	4.5	6.4

6 Outlet Valve

Flow (GPM)	10	20	30
PSI Loss	2.5	4.5	7.5

- Inlet: Slip and Glue Connection
  4400 Series: to 1 1/4" PVC Pipe
  4410 Series: to 1" PVC Pipe
  4600 Series: to 1 1/4" PVC Pipe
  4610 Series: to 1" PVC Pipe
- Outlets: Slip and Glue Connections
  4400 Series: to 1 1/4" PVC Pipe
  4410 Series: to 1" PVC Pipe
  4600 Series: to 1" PVC Pipe
  4610 Series: to 1" PVC Pipe
- Dimensions: Height: 5-3/4"
  Width: 5-3/4"

INSTALLATION TIPS

- We Recommend the Installation of an Atmospheric Vacuum Breaker Between the Pump and the Valve.

C1 SERIES - 1/2 HP

APPLICATIONS

Gray water pumping, filtered effluent service water pumping,
water reclamation projects such as pumping from rain catchment basins,
aeration and other fountain or pond applications, agriculture and livestock water pumping

FEATURES

- Supplied with a removable 5" base for secure and reliable mounting
- Bottom suction design
- Robust thermoplastic discharge head design resists breakage during installation and operation
- Single shell housing design provides a compact unit while ensuring quiet operation
- Hydraulic components molded from high quality engineered thermoplastics
- Optimized hydraulic design allows for increased performance and decreased power usage
- All metal components are made of high grade stainless steel for corrosion resistance
- Available with a high quality 115 V or 230 V, 1/2 hp motor
- Fluid flows of 10, 20, and 30 gpm, with a maximum shut-off pressure of 100 psi
- Heavy-duty 600 V 10 foot SOOW jacketed lead

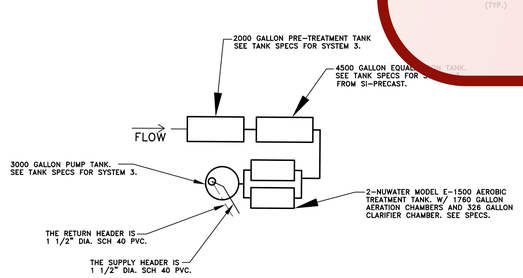
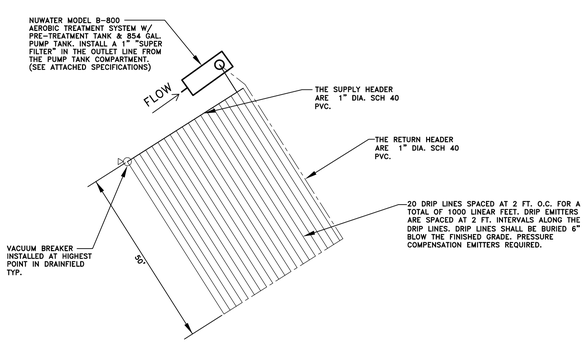
SCALE: 1" = 60'

SYSTEM LAYOUT

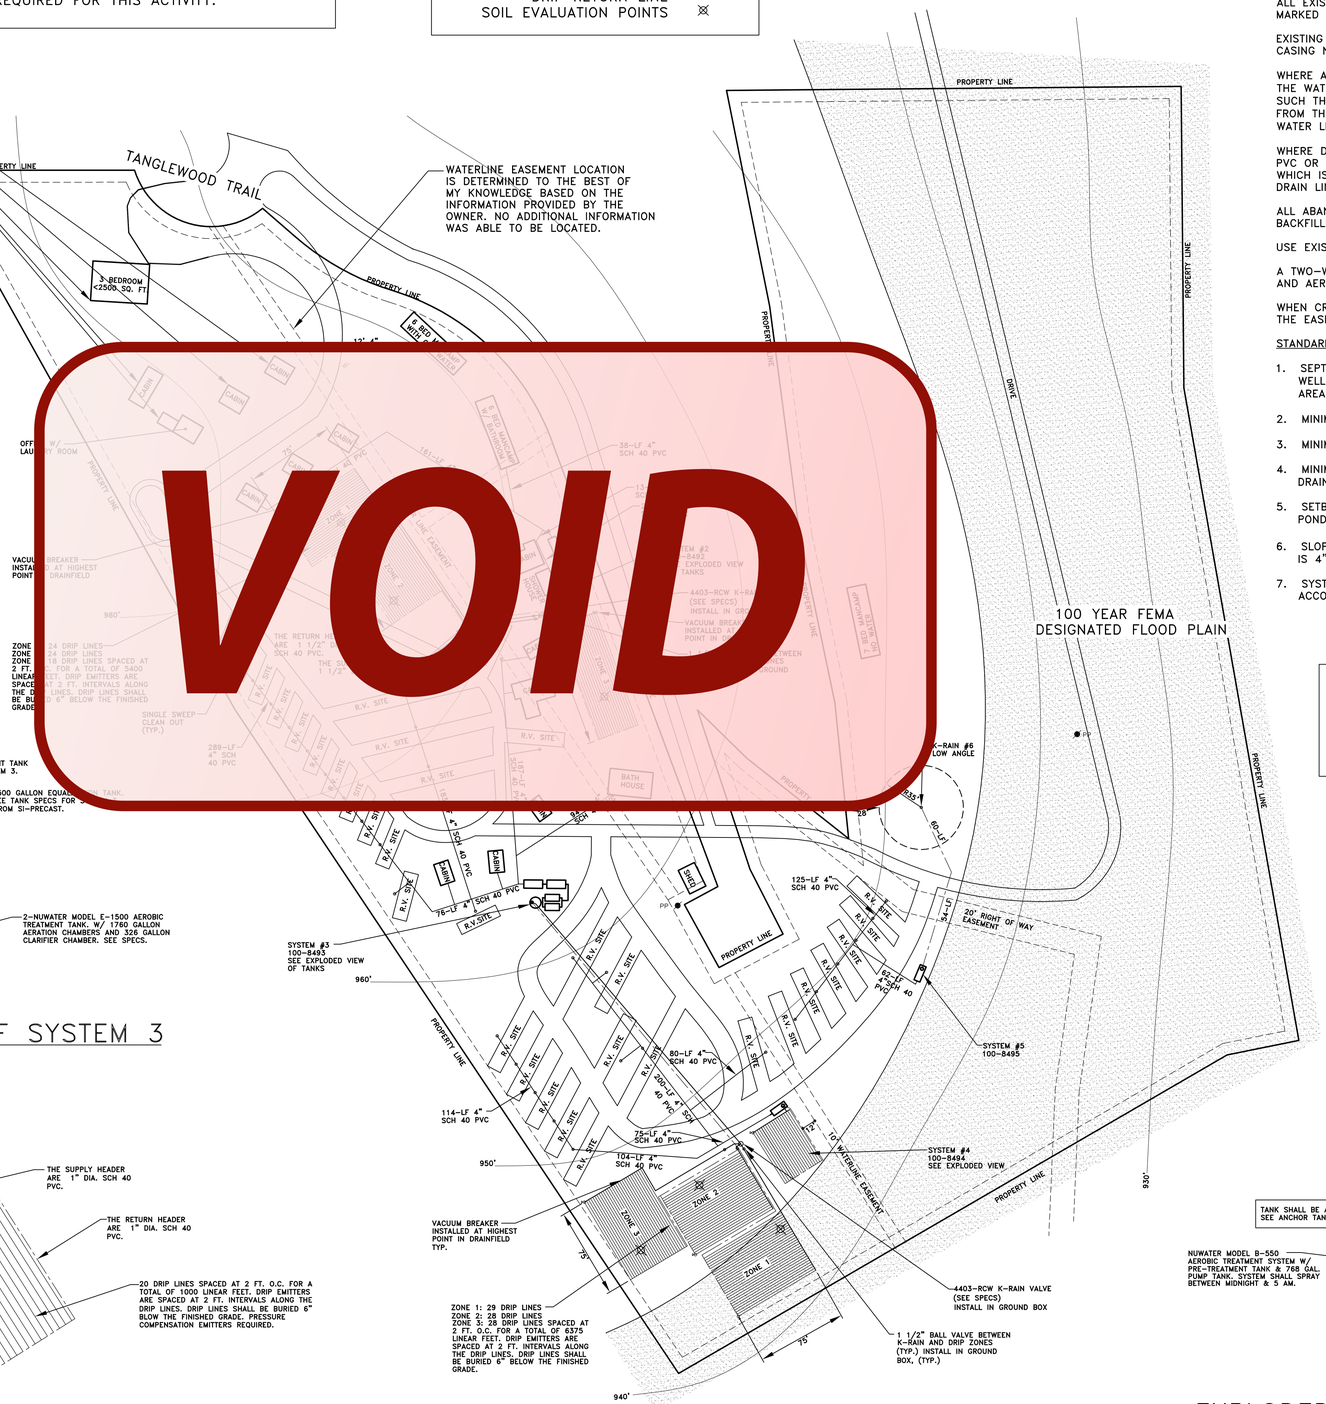
60 0 60 120



EXPLODED VIEW OF SYSTEM 3



EXPLODED VIEW OF SYSTEM 4



SITE NOTES:

ALL EXISTING UNDERGROUND UTILITIES SHALL BE LOCATED AMD MARKED BEFORE ANY EXCAVATION BEGINS.

EXISTING WATER LINE LOCATIONS ARE UNDETERMINED. SEE WATER CASING NOTE AS REQUIRED.

WHERE A WATER LINE IS CLOSER THAN 10' TO A WASTEWATER MAIN, THE WATER LINE SHALL BE CASED INSIDE OF A SCH 40 PVC PIPE SUCH THAT THE ENDS OF THE CASING ARE AT LEAST. 10' AWAY FROM THE WASTEWATER MAIN. IN ADDITION, IF THE LINES CROSS, THE WATER LINE SHALL BE AT LEAST 6" ABOVE THE WASTEWATER MAIN.

WHERE DRAIN LINES PASS UNDER ROADWAYS, THEY SHALL BE SCH 80 PVC OR THEY SHALL BE SLEEVED INSIDE OF A SCH 40 PVC PIPE WHICH IS AT LEAST TWO NOMINAL PIPE SIZES LARGER THAN THE DRAIN LINE.

ALL ABANDONED SEPTIC TANKS SHALL BE LOCATED, PUMPED, BACKFILLED & CAVED-IN.

USE EXISTING SEWER LINES UNDER R.V. SITES WHERE POSSIBLE.

A TWO-WAY CLEAN OUT SHALL BE INSTALLED BETWEEN THE BUILDING AND AEROBIC TANKS.

WHEN CROSSING EASEMENT LINES, PERMISSION SHALL BE GRANTED BY THE EASEMENT HOLDER BEFORE ANY EXCAVATION BEGINS.

STANDARD NOTES:

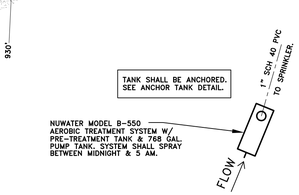
1. SEPTIC TANK MUST BE A MINIMUM OF 50' FROM ANY WATER WELL. CLOSEST DISTANCE FROM ANY PART OF THE DRAINFIELD AREA TO A WATER WELL MUST BE 100' MINIMUM.
2. MINIMUM SETBACK OF SPRAY AREA FROM PROPERTY LINE IS 20'.
3. MINIMUM SETBACK OF DRIP AREA FROM PROPERTY LINE IS 5'.
4. MINIMUM SEPARATION DISTANCE BETWEEN SEPTIC TANK OR DRAINFIELD AREA AND WATER SUPPLY LINES IS 10'.
5. SETBACK OF SPRAY OR DRIP AREA FROM LAKES, STREAMS, PONDS, AND RIVERS IS 50' MINIMUM.
6. SLOPE OF INFLOW LINE TO TANK IS $\frac{1}{8}$ INCH PER FOOT RUN. PIPE IS 4" SCH 40 PVC.
7. SYSTEM SHALL BE INSPECTED BY THE COUNTY INSPECTOR IN ACCORDANCE WITH CURRENT COUNTY INSPECTION PROCEDURES.

PER COUNTY REQUIREMENTS, THE FLOW TO EACH SEPTIC SYSTEM SHALL BE METERED. CONTACT COUNTY TO DETERMINE AN ACCEPTABLE METERING PROCESS.

FLOAT SETTINGS & DISTANCES ABOVE THE INSIDE BOTTOM OF THE PUMP COMPT. ARE AS FOLLOWS:

ON: 21" - 304 GAL.
OFF: 20" - 290 GAL.
ALARM LEVEL: 43" - 623 GAL.
TANK INLET: 53" - 768 GAL.

DISTANCE BETWEEN ALARM LEVEL & TANK INLET IS 10" WHICH CORRESPONDS TO 145 GAL.



EXPLODED VIEW OF SYSTEM 5

ALL SPRINKLERS ARE K-RAIN TYPE W/ LOW ANGLE NOZZLES

THE DISTRIBUTION LINE TO THE SPRINKLERS IS A 1" DIA. SCH 40 PVC LINE

SOIL SHALL BE PRESENT OVER ENTIRE SEPTIC SYSTEM SPRAY AREA. SPRAY AREA SHALL BE SEEDED WITH GRASS, EVERGREEN SHRUBS, BUSHES, TREES, OR LANDSCAPED BEDS CONTAINING MIXED VEGETATION MAY ALSO BE ADDED TO THE SPRAY AREA.

Subject: Re: 113609, 113610, 113611, 113612

1. Certify that waterline crossing's equivalent protection complies with TAC 290

- Added note to the design see attached.

2. Provide the release of easement crossings

- The owners will take care of this.

✓ How is it determined that half the people will go to the Shower House and the other half to the Bath House

- This was already taken care of.

✓ System 3 application does not reflect the Bath House

Corrected see attachment.

✓ All systems will need to have a daily flow meter to provide daily meter readings once a month for 1 year.

- Updated note on drawing page to what we discussed on the phone.

✓ Present how system 1 will provide daily water use records

- Agreed to using the water meter for those facilities.

ALARM LEVEL: 43" - 623 GAL.
TANK INLET: 53" - 768 GAL.

DISTANCE BETWEEN ALARM LEVEL & TANK INLET IS 10" WHICH CORRESPONDS TO 145 GAL.

ALL SPRINKLERS ARE K-RAIN TYPE W/ LOW ANGLE NOZZLES

THE DISTRIBUTION LINE TO THE SPRINKLERS IS A 1" DIA. SCH 40 PVC LINE

SOIL SHALL BE PRESENT OVER ENTIRE SEPTIC SYSTEM SPRAY AREA. SPRAY AREA SHALL BE SEEDED WITH GRASS, EVERGREEN SHRUBS, BUSHES, TREES, OR LANDSCAPED BEDS CONTAINING MIXED VEGETATION MAY ALSO BE ADDED TO THE SPRAY AREA.

SITE NOTES:

ALL EXISTING UNDERGROUND UTILITIES SHALL BE LOCATED AMD MARKED BEFORE ANY EXCAVATION BEGINS.

EXISTING WATER LINE LOCATIONS ARE UNDETERMINED. SEE WATER CASING NOTE AS REQUIRED.

WHERE A WATER LINE IS CLOSER THAN 10' TO A WASTEWATER MAIN, THE WATER LINE SHALL BE CASED INSIDE OF A SCH 40 PVC PIPE SUCH THAT THE ENDS OF THE CASING ARE AT LEAST. 10' AWAY FROM THE WASTEWATER MAIN. IN ADDITION, IF THE LINES CROSS, THE WATER LINE SHALL BE AT LEAST 6" ABOVE THE WASTEWATER MAIN.

WHERE DRAIN LINES PASS UNDER ROADWAYS, THEY SHALL BE SCH 80 PVC OR THEY SHALL BE SLEEVED INSIDE OF A SCH 40 PVC PIPE WHICH IS AT LEAST TWO NOMINAL PIPE SIZES LARGER THAN THE DRAIN LINE.

ALL ABANDONED SEPTIC TANKS SHALL BE LOCATED, PUMPED, BACKFILLED & CAVED-IN.

USE EXISTING SEWER LINES UNDER R.V. SITES WHERE POSSIBLE.

WAY CLEAN OUT SHALL BE INSTALLED BETWEEN THE BUILDING TANKS.

WHEN CROSSING EASEMENT LINES, PERMISSION SHALL BE GRANTED BY THE EASEMENT HOLDER BEFORE ANY EXCAVATION BEGINS.

STANDARD NOTES:

1. SEPTIC TANK MUST BE A MINIMUM OF 50' FROM ANY WATER WELL. CLOSEST DISTANCE FROM ANY PART OF THE DRAINFIELD AREA TO A WATER WELL MUST BE 100' MINIMUM.
2. MINIMUM SETBACK OF SPRAY AREA FROM PROPERTY LINE IS 20'.
3. MINIMUM SETBACK OF AREA FROM PROPERTY LINE IS 5'.
4. MINIMUM SEPARATION DISTANCE BETWEEN SEPTIC TANK OR DRAINFIELD AREA AND ER SUPPLY LINES IS 10'.
5. SETBACK OF SPRAY OR RIP AREA FROM LAKES, STREAMS, PONDS, AND RIVERS IS ' MINIMUM.
6. SLOPE OF INFLOW LINE TANK IS $\frac{1}{8}$ INCH PER FOOT RUN. PIPE IS 4" SCH 40 PVC.
7. WHERE PARALLEL SEWER AND NEW WATER LINES ARE CLOSER THAN 9' THE REQUIREMENTS AS SPECIFIED IN TCEQ, SUBCHAPTER D, 290.44(e)(4)(A) SHALL BE STRICTLY FOLLOWED.
8. WHERE SEWER AND NEW WATER LINES CROSS, THE REQUIREMENTS SPECIFIED IN TCEQ, SUBCHAPTER D, 290.44(e)(4)(B) SHALL BE STRICTLY FOLLOWED.
9. SYSTEM SHALL BE INSPECTED BY THE COUNTY INSPECTOR IN ACCORDANCE WITH CURRENT COUNTY INSPECTION PROCEDURES.

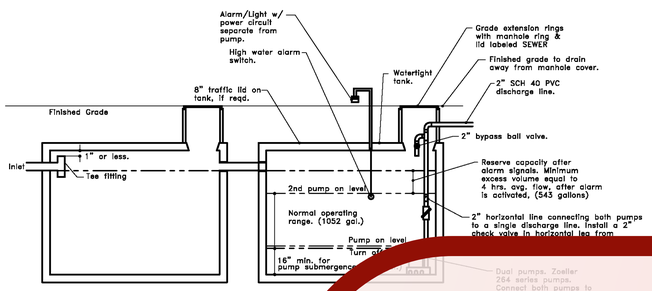
SYSTEM #2 TANK SPECS:



2000 GAL. PRE-TREATMENT TANK & 45 GALLON EQUALIZATION TANK

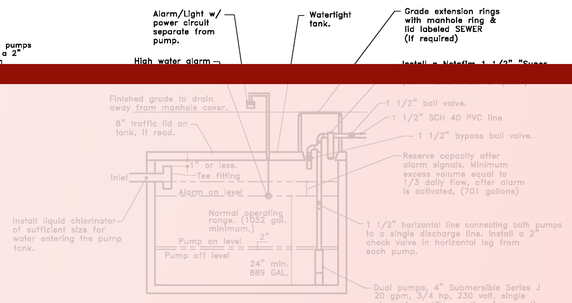
SET VALVES, FLOATS, AND TIMERS TO DELIVER A MINIMUM OF 16 GAL./MIN., AND 61 GALLONS PER HOUR TO THE AEROBIC TREATMENT UNITS, TOTAL.

NOTES:

THE ALARM ON LEVEL SHALL BE BELOW THE 2ND PUMP ON LEVEL. THE ALARM SYSTEM SHALL HAVE A LOCK-ON FEATURE SO THAT ONCE IT IS ACTIVATED, IT WILL NOT GO OFF WHEN THE 2ND PUMP DRAWS THE LIQUID LEVEL BELOW THE ALARM ON LEVEL. BOTH AUDIO AND VISUAL ALARMS SHALL HAVE A MANUAL SILENCE SWITCH.

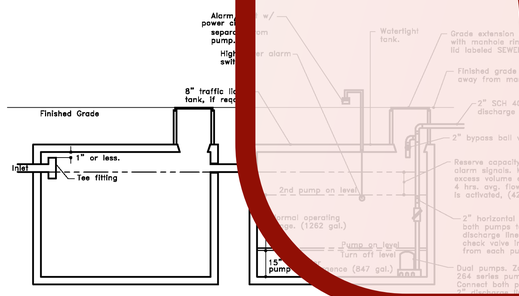
ALL ELECTRICAL WIRING SHALL BE IN ACCORDANCE WITH THE MOST RECENT EDITION OF THE NATIONAL ELECTRIC CODE. CONNECTIONS SHALL BE IN APPROVED JUNCTION BOXES AND ALL EXTERNAL POWER WIRING SHALL BE IN APPROVED ELECTRICAL CONDUIT, BURIED, AND TERMINATED AT A MAIN CIRCUIT BREAKER PANEL OR SUB-PANEL. ALL ELECTRICAL COMPONENTS SHOULD HAVE AN ELECTRICAL DISCONNECT WITHIN DIRECT VISION. ELECTRICAL DISCONNECTS MUST BE WEATHERPROOF (APPROVED FOR OUTDOOR USE) AND HAVE MAINTENANCE LOCKOUT PROVISIONS.

USE A LARGER TANK IF REQUIRED TO MEET MINIMUM STORAGE REQUIREMENTS.



3000 GAL. PUMP TANK DETAIL

SYSTEM #3 TANK SPECS:



2000 GAL. PRE-TREATMENT TANK & 4500 GALLON EQUALIZATION TANK

SET VALVES, FLOATS, AND TIMERS TO DELIVER A MAXIMUM OF 16 GAL./MIN., AND 74 GALLONS PER HOUR TO THE AEROBIC TREATMENT UNITS, TOTAL.

NOTES:

THE ALARM ON LEVEL SHALL BE BELOW THE 2ND PUMP ON LEVEL. THE ALARM SYSTEM SHALL HAVE A LOCK-ON FEATURE SO THAT ONCE IT IS ACTIVATED, IT WILL NOT GO OFF WHEN THE 2ND PUMP DRAWS THE LIQUID LEVEL BELOW THE ALARM ON LEVEL. BOTH AUDIO AND VISUAL ALARMS SHALL HAVE A MANUAL SILENCE SWITCH.

ALL ELECTRICAL WIRING SHALL BE IN ACCORDANCE WITH THE MOST RECENT EDITION OF THE NATIONAL ELECTRIC CODE. CONNECTIONS SHALL BE IN APPROVED JUNCTION BOXES AND ALL EXTERNAL POWER WIRING SHALL BE IN APPROVED ELECTRICAL CONDUIT, BURIED, AND TERMINATED AT A MAIN CIRCUIT BREAKER PANEL OR SUB-PANEL. ALL ELECTRICAL COMPONENTS SHOULD HAVE AN ELECTRICAL DISCONNECT WITHIN DIRECT VISION. ELECTRICAL DISCONNECTS MUST BE WEATHERPROOF (APPROVED FOR OUTDOOR USE) AND HAVE MAINTENANCE LOCKOUT PROVISIONS.

USE A LARGER TANK IF REQUIRED TO MEET MINIMUM STORAGE REQUIREMENTS.

CALCULATIONS TO DETERMINE PERMITTED FLOW FOR COMAL COUNTY:

THE PERMITTED FLOW FOR EACH SYSTEM IS BASED ON WATER RECORDS PROVIDED BY THE OWNER OVER AN ENTIRE YEAR. THE TCEQ DAILY FLOW FOR THE PARK SHALL BE USED TO SIZE EACH SYSTEM. A DIRECT RATIO WILL BE USED TO DETERMINE HOW THAT WATER IS DISTRIBUTED THROUGHOUT THE PARK FOR THE PERMIT APPLICATIONS. SEE CALCULATIONS BELOW.

MAXIMUM DAILY DEMAND FROM FEBRUARY LODGE WATER (100510 GALLONS) AND APRIL CABINS WATER RECORDS (30480 GALLONS)

100510 GALLONS / 28 DAYS OF FEBRUARY = 3590 GPD
30480 GALLONS / 30 DAYS OF APRIL = 1016 GPD
$Q_{TOTAL-PARK-WATER-USAGE}$ = 4606 GPD

DIRECT RATIO EQUATION:

$$\frac{Q_{TCEQ-COMPONENT}}{Q_{TCEQ-TOTAL-PARK}} = \frac{Q_{COMPONENT}}{Q_{TOTAL-PARK-WATER-RECORDS}}$$

FOR SYSTEM 1 $Q_{TCEQ\ COMPONENT}$:

3 BEDROOM <2500 SQ. FT. Q = 240 GPD
OFFICE W/5 EMPLOYEES Q= 5 EMPLOYEES(4 GPD/ PERSON)=20 GPD
LAUNDRY ROOM W/ 4 WASHING MACHINES
Q= 4 WASHING MACHINES (200 GPD / MACHINE) = 800 GPD
3 CABINS (AS AN APARTMENT)
Q= 100 GPD/ CABIN (3 CABINS) = 300 GPD

$Q_{TCEQ\ COMPONENT}$ = 1360 GPD SYSTEM #1

FOR SYSTEM 2 $Q_{TCEQ\ COMPONENT}$:

4 CABINS (AS AN APARTMENT)
Q= 100 GPD/ CABIN (4 CABINS) = 400 GPD
6 BED MANCAMP WITH 1 COMMON BATHROOM (SIZED AS HOTEL ROOM)
Q = 60 GPD / BED (6 BEDS) = 360 GPD
SHOWER HOUSE Q = 1344 GPD (TOTAL BATH USAGE EQUALLY DIVIDED AMONGST BOTH SHOWER HOUSES. SEE CALCULATIONS FOR EXPLANATION)

$Q_{TCEQ\ COMPONENT}$ = 2104 GPD SYSTEM #2

FOR SYSTEM 3 $Q_{TCEQ\ COMPONENT}$:

Q = 17 RV (40 GPD / RV) = 680 GPD
5 CABINS (AS AN APARTMENT)
Q= 100 GPD/ CABIN (5 CABINS) = 500 GPD
SHOWER HOUSE Q = 1344 GPD (TOTAL BATH USAGE EQUALLY DIVIDED AMONGST BOTH SHOWER HOUSES. SEE CALCULATIONS FOR EXPLANATION)

$Q_{TCEQ\ COMPONENT}$ = 2524 GPD SYSTEM #3

FOR SYSTEM 4 $Q_{TCEQ\ COMPONENT}$:

SITES (40 GPD/ SITE) = 400 GPD

$Q_{TCEQ\ COMPONENT}$ = 400 GPD SYSTEM #4

FOR SYSTEM 5 $Q_{TCEQ\ COMPONENT}$:

SITES (40 GPD/ SITE) = 240 GPD

$Q_{TCEQ\ COMPONENT}$ = 240 GPD SYSTEM #5

FLOW FOR BATH HOUSE/SHOWER HOUSE:

GAGE FROM RV (33 TOTAL RV) = 9
GAGE FROM
Q = 25 PEOPLE/ SITE) (28 GPD 400 GPD
USAGE FROM
Q = 13) = 364 GPD

Q TOTAL FOR BOTH BA HOUSE
FOR A ED TCEQ FLOW

SURE PARK PER TCEQ:

$Q_{TCEQ-TOTAL-PARK}$ = 2524 GPD + 400 GPD + 240 GPD= 6628 GPD

DIRECT RATIO FOR SYSTEM 1 $Q_{COMPONENT}$:

$$\frac{1360\ GPD\ TCEQ\ COMPONENT}{6628\ TCEQ\ TOTAL} = \frac{Q\ COMPONENT}{4606\ TOTAL\ PARK\ WATER\ RECORDS}$$

Q PERMITTED COMPONENT = 946 GPD FOR SYSTEM #1

DIRECT RATIO FOR SYSTEM 2 $Q_{COMPONENT}$:

$$\frac{2104\ GPD\ TCEQ\ COMPONENT}{6628\ TCEQ\ TOTAL} = \frac{Q\ COMPONENT}{4606\ TOTAL\ PARK\ WATER\ RECORDS}$$

Q PERMITTED COMPONENT = 1463 GPD FOR SYSTEM #2

DIRECT RATIO FOR SYSTEM 3 $Q_{COMPONENT}$:

$$\frac{2524\ GPD\ TCEQ\ COMPONENT}{6628\ TCEQ\ TOTAL} = \frac{Q\ COMPONENT}{4606\ TOTAL\ PARK\ WATER\ RECORDS}$$

Q PERMITTED COMPONENT = 1755 GPD FOR SYSTEM #3

DIRECT RATIO FOR SYSTEM 4 $Q_{COMPONENT}$:

$$\frac{400\ GPD\ TCEQ\ COMPONENT}{6628\ TCEQ\ TOTAL} = \frac{Q\ COMPONENT}{4606\ TOTAL\ PARK\ WATER\ RECORDS}$$

Q PERMITTED COMPONENT = 278 GPD FOR SYSTEM #4

DIRECT RATIO FOR SYSTEM 5 $Q_{COMPONENT}$:

$$\frac{240\ GPD\ TCEQ\ COMPONENT}{6628\ TCEQ\ TOTAL} = \frac{Q\ COMPONENT}{4606\ TOTAL\ PARK\ WATER\ RECORDS}$$

Q PERMITTED COMPONENT = 167 GPD FOR SYSTEM #5

SITE EVALUATION AND CALCULATIONS

Site Evaluation:

Soil Texture:	Clay loam
Soil Structure:	Blocky
Soil Depth:	0” to 18”
Restrictive Horizon:	Rock horizon from 0” to 18” below surface
Groundwater:	None encountered
Topography:	Less 2% slope at spray areas

Determination: Site was determined to have a Class III soil with no groundwater encountered. Due to the rock over the drainfield area an aerobic treatment unit followed by spray irrigation will be installed. The spray area will be controlled by a commercial irrigation timer.

VOID

Calculations:

System [illegible] the cal[illegible]ted f[illegible]se[illegible]ater r[illegible]ds i[illegible] gp[illegible] system shall be over[illegible]gned [illegible]atch[illegible] TCEQ d[illegible]ated [illegible]v of [illegible] gpd. SITE EVALUATION AND CALCULATIONS

Calculations:

Install 1 sprinkler. The sprinkler is a K-Rain low angle type, with nozzle and spray radius as shown on the System Layout. See System Layout for spray pattern.

Proposed total area = **3848 sq. ft.**

Overlap and masked area: **0 sq. ft.**

Actual covered area = 3848 sq. ft. (Covered area is greater than required area)

A 1" ball valve will be installed just downstream of the pump either inside of or outside

radius(radii) of the sprinkler(s) to the value(s) shown on the System Layout.
(Reference the attached data for pump curves and nozzle data.)

NOTES FOR INSTALLER (if applicable):

Do not c ect wate tener to sept sten

The TCE ows w ng ine wate be d arge thout t ent into a separate wat yste less the co as h n waste. ning this water out ara om t eptic syste n p ng t e of the em.

Areas whe and dr lds / sp reas loca shall b -up or drained so that no g of wate e ar

The design application rate is 0.062 gallons / sq. ft. / day

Dosing cycle quantity is 240 gallons, average. Use a commercial irrigation timer.

The number of dosing cycles per day is one (1).

SITE EVALUATION AND CALCULATIONS

The design pressure at each sprinkler head is 30 to 40 psig.

The total length of supply pipe is as shown on the System Layout

Means of preventing siphoning is an anti-siphon valve.

Diameter of supply line is as shown on the System Layout.

Flow control valve is required downstream of the pump.

NOTES TO OWNER OF SYSTEM:
MAINTENANCE AND MANAGEMENT PRACTICES (if applicable):

A OSSF should not be treated as if it were a normal city sewer system.

The excessive use of in-sink garbage grinders and grease discarding should be avoided.

Do not use the toilet to dispose of cleansing tissues, cigarette butts or other trash.

Septic tanks shall be cleaned before sludge accumulates to the point where approaches the bottom of the outlet device to prevent solids from exiting the tank with the liquid.

Septic tanks must be cleaned every two years to prevent excessive sludge buildup.

Do not build driveways, storage buildings, or other structures over the treatment works or its disposal field.

Chemical additives or the so-called enzymes are not necessary for the operation of a septic tank. Some of these additives may be harmful to the tank's operation.

SITE EVALUATION AND CALCULATIONS

Soaps, detergents, bleaches, drain cleaners, and other household cleaning materials will very seldom affect the operation of the system. However, moderation should be exercised in the use of such materials.

It is not advisable to allow water softener back flush to enter into any portion of the OSSF.

Except for Aerobic systems, the liquid from the OSSF is still heavily laden with bacteria. Contact with this liquid should be avoided, if it surfaces.

WATER CONSERVATION MEASURES (if applicable):

Showers usually use less water than baths. Install a water saving shower head that uses less than 2 1/2 gallons per minute and saves both water and energy.

If you take a tub bath, reduce the level of water in the tub from the level to which you customarily fill it.

Leaky faucets and flapper type toilet stop-up mechanisms should be repaired as quickly as possible.

Check toilets for leaks that may not be apparent and add a few drops of food coloring to the tank. Do not flush. If color appears in the bowl within a few minutes, the toilet fill or ball-valve needs to be adjusted to prevent water from overflowing the stand pipe, or there is a leak at the bottom of the toilet tank that needs to be repaired.

Reduce the amount of water used for flushing the toilet by installing one of the following: a new toilet (1.6 gallon); a toilet tank dam; or filling and capping one-quart plastic bottles with water (usually one is all that will fit in smaller toilet tanks) and lowering them into the tank of the existing 3.5 gallon or larger toilet. Do not use bricks since they may crumble and cause damage to the fixture.

SITE EVALUATION AND CALCULATIONS

Try to run the dishwasher with a full load, whenever possible.

Avoid running the water continuously for brushing teeth, washing hands, rinsing kitchen utensils, or for cleaning vegetables.

Use faucet aerators that restrict flow to no more than 2.2 gallons per minute to reduce water consumption.

Keep a container of drinking water in the refrigerator instead of running the faucet until the water turns cool.

Insulate all hot water pipes to avoid long delays of wasted water while waiting for the heated water.

Ask your city, county, or local government about their programs to conserve water, and how they can help you save water.

Subject: Re: FW: Rebecca Creek As-built for System 4 & 5

Brandon,

Attached is the signed application from me. This job we are permitting the water records but sizing the systems to accommodate the TCEQ flow. The flow on the application is correct.

System 2&3 aren't installed yet. We are hoping to complete 4 & 5 and move on to the other 2 systems.

Thank you,
Kaeleigh

RE: 3660 Tanglewood Trail

Property Owner & Agent,

We received planning materials for the referenced permit application on 11-18-2021 and found those planning materials to be deficient. In order to continue processing this permit, we need the following:

1. System 3
    a. The drip lines that cross over the 100 year floodplain need to meet the requirements below.

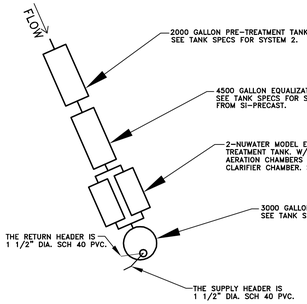
REVISED
8:57 am, Dec 12, 2022

THE INSTALLATION OF THE 4 PROPOSED SEPTIC SYSTEMS WILL DISTURB LESS THAN 5 ACRES. THEREFORE PER 30 TAC 213.21, A CONTRIBUTING ZONE PLAN IS NOT REQUIRED FOR THIS ACTIVITY.

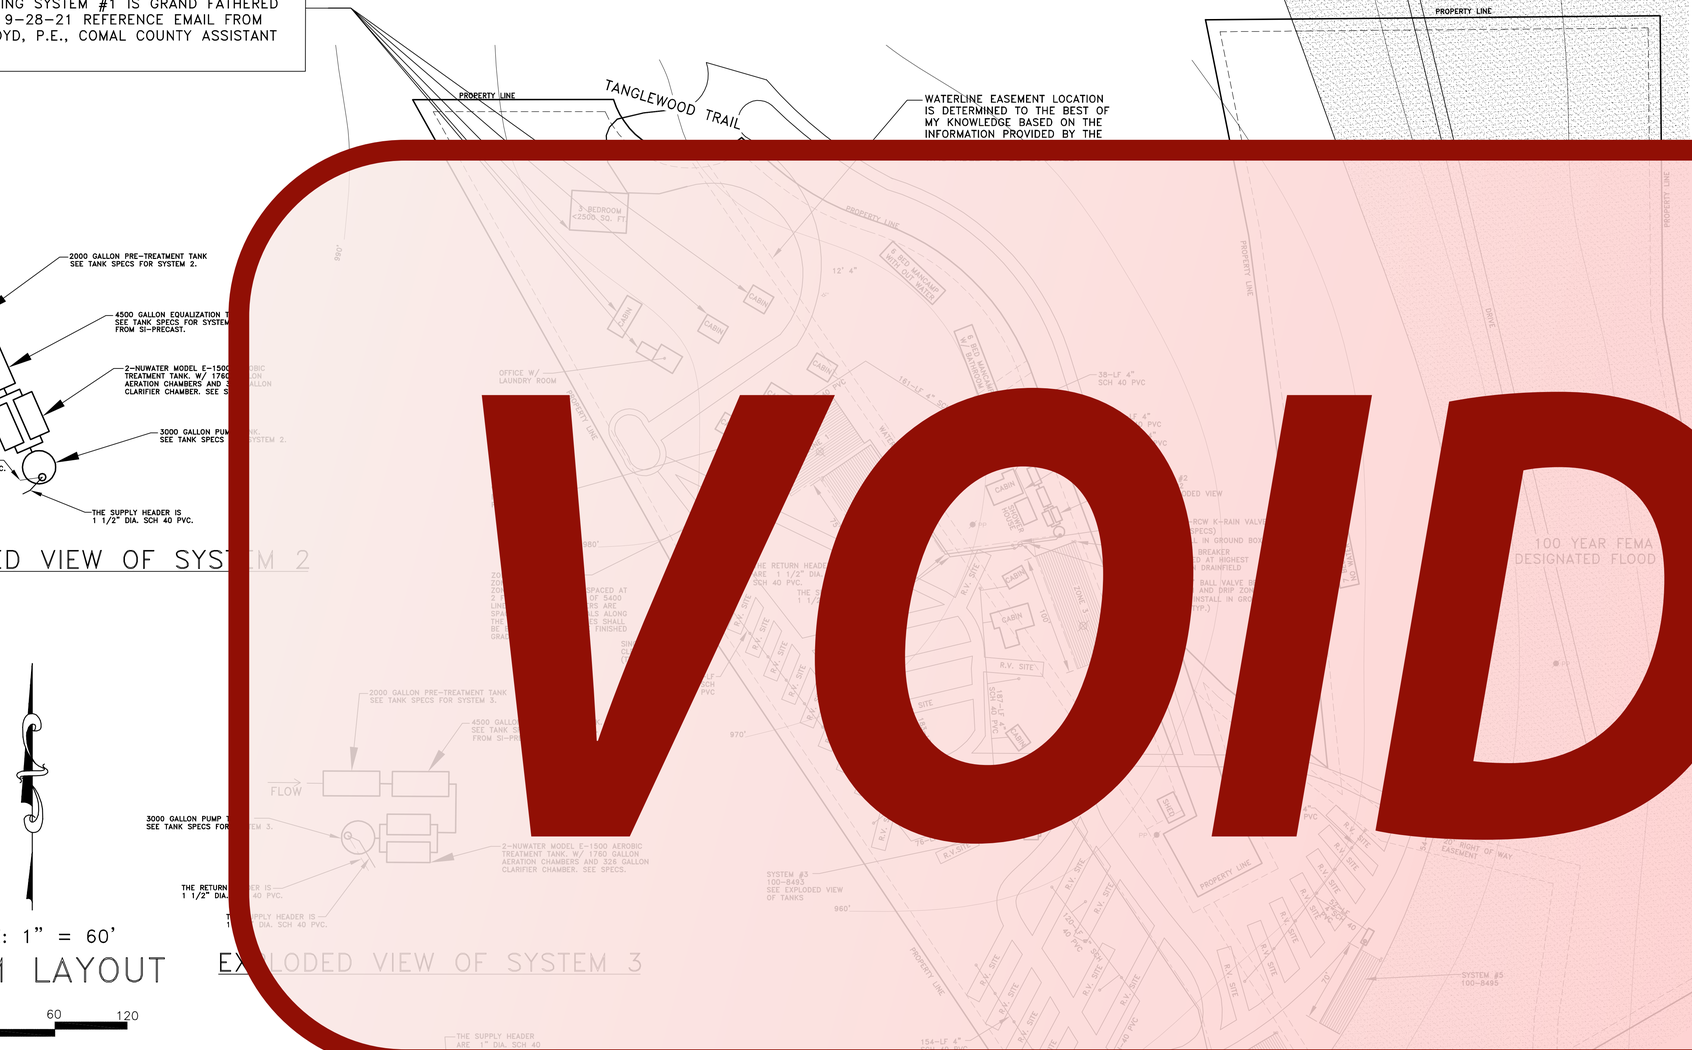
LEGEND:
10' UTILITIES EASEMENT
DRIP SUPPLY LINE
DRIP RETURN LINE
SOIL EVALUATION POINTS

MANGOLD ENGINEERING COMPANY WILL NOT BE RESPONSIBLE FOR THE CONSEQUENCES OF THE USE OF ANY PART OF THE ENGINEERING OF THIS SEPTIC SYSTEM BEFORE THE ENGINEERING HAS BEEN COMPLETELY AND FINALLY APPROVED BY THE APPROPRIATE COUNTY AUTHORITY IN THE COUNTY FOR WHICH IT IS INTENDED. IF TEST HOLES WERE NOT PRESENT DURING THE SITE-EVALUATION, THE OWNER/INSTALLER SHALL BE RESPONSIBLE FOR DIGGING TEST HOLES AND CONTACTING MANGOLD ENGINEERING COMPANY PRIOR TO ANY USE OF THIS ENGINEERING DESIGN.

THIS EXISTING SYSTEM #1 IS GRAND FATHERED IN, AS OF 9-28-21 REFERENCE EMAIL FROM ROBERT BOYD, P.E., COMAL COUNTY ASSISTANT ENGINEER.



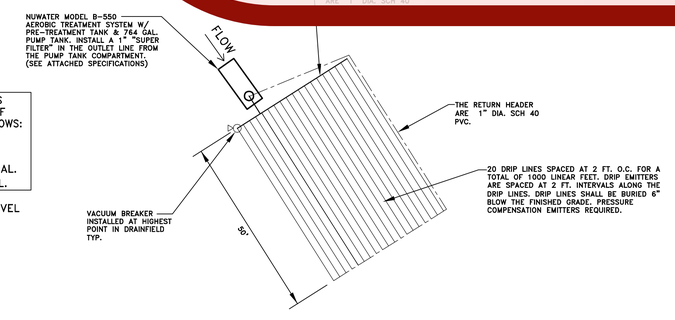
EXPLODED VIEW OF SYSTEM 2



SCALE: 1" = 60'

SYSTEM LAYOUT

60 0 60 120

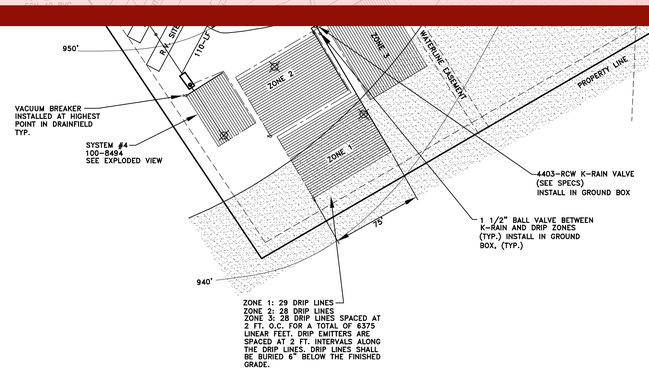


FLOAT SETTINGS & DISTANCES ABOVE THE INSIDE BOTTOM OF THE PUMP COMPT. ARE AS FOLLOWS:

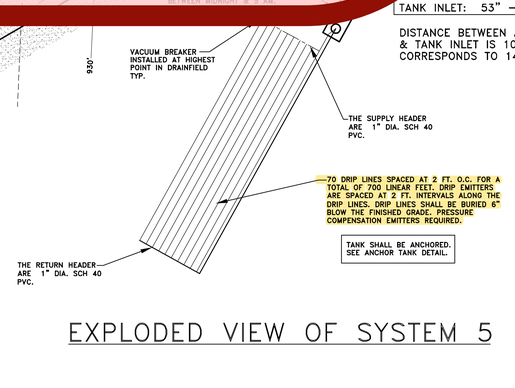
ON: 18" – 260 GAL.
OFF: 17" – 246 GAL.
ALARM LEVEL: 43" – 693 GAL.
TANK INLET: 53" – 768 GAL.

DISTANCE BETWEEN ALARM LEVEL & TANK INLET IS 10" WHICH CORRESPONDS TO 145 GAL.

EXPLODED VIEW OF SYSTEM 4



EXPLODED VIEW OF SYSTEM 5



SITE NOTES:

ALL EXISTING UNDERGROUND UTILITIES SHALL BE LOCATED AMD MARKED BEFORE ANY EXCAVATION BEGINS.

EXISTING WATER LINE LOCATIONS ARE UNDETERMINED. SEE WATER CASING NOTE AS REQUIRED.

WHERE A WATER LINE IS CLOSER THAN 10' TO A WASTEWATER MAIN, THE WATER LINE SHALL BE CASED INSIDE OF A SCH 40 PVC PIPE SUCH THAT THE ENDS OF THE CASING ARE AT LEAST. 10' AWAY FROM THE WASTEWATER MAIN. IN ADDITION, IF THE LINES CROSS, THE WATER LINE SHALL BE AT LEAST 6" ABOVE THE WASTEWATER MAIN.

WHERE DRAIN LINES PASS UNDER ROADWAYS, THEY SHALL BE SCH 80 PVC OR THEY SHALL BE SLEEVED INSIDE OF A SCH 40 PVC PIPE WHICH IS AT LEAST TWO NOMINAL PIPE SIZES LARGER THAN THE DRAIN LINE.

ALL ABANDONED SEPTIC TANKS SHALL BE LOCATED, PUMPED,

USE EXISTING SEWER LINE[S] FOR R.V. SITES WHERE POSSIBLE.

A TWO-WAY CLEAN OUT SHALL BE INSTALLED BETWEEN THE BUILDING AND AEROBIC TANKS.

WHEN CROSSING EASEMENT LINES, PERMISSION SHALL BE GRANTED BY THE EASEMENT HOLDER BEFORE ANY EXCAVATION BEGINS.

STANDARD NOTES:

1. SEPTIC TANK MUST BE A MINIMUM OF [illegible]' FROM ANY WATER WELL. CLOSEST DISTANCE FROM ANY PART OF THE DRAINFIELD AREA TO A WATER WELL MUST BE 100' MINIMUM.
2. MINIMUM SETBACK OF SPRAY AREA FROM PROPERTY LINE IS 20'.
3. MINIMUM SETBACK OF DRIP AREA FROM PROPERTY LINE IS 5'.
4. MINIMUM SEPARATION DISTANCE BETWEEN SEPTIC TANK OR DRAINFIELD AREA AND WATER SUPPLY LINES IS 10'.
5. SETBACK OF SPRAY OR DRIP AREA FROM LAKES, STREAMS, PONDS, AND RIVERS IS 50' MINIMUM.
6. SLOPE OF INFLOW LINE TO TANK IS 1/4 INCH PER FOOT RUN. PIPE IS 4" SCH 40 PVC.
7. WHERE PARALLEL SEWER AND NEW WATER LINES ARE CLOSER THAN 9' THE REQUIREMENTS SPECIFIED IN TCEQ, SUBCHAPTER D, 290.44(e)(4)(A) SHALL BE STRICTLY FOLLOWED.
8. WHERE SEWER AND NEW WATER LINES CROSS, THE REQUIREMENTS SPECIFIED IN TCEQ, SUBCHAPTER D, 290.44(e)(4)(B) SHALL BE STRICTLY FOLLOWED.
9. SYSTEM SHALL BE INSPECTED BY THE COUNTY INSPECTOR IN ACCORDANCE WITH CURRENT COUNTY INSPECTION PROCEDURES.

PER COUNTY REQUIREMENTS, A FLOW METER SHALL BE INSTALLED ON THE SUPPLY LINE AND RETURN LINE OF EACH AEROBIC UNIT FOLLOWED BY A DRIP IRRIGATION SYSTEM. FOR THE AEROBIC UNIT WITH SPRAY ONLY, A METER SHALL BE INSTALLED ON THE SUPPLY LINE TO THE SPRINKLER. THE FLOW TO EACH SEPTIC SYSTEM SHALL BE METERED. EACH SYSTEM SHALL BE MONITORED, RECORDED & SUBMITTED TO COMAL COUNTY FOR ONE YEAR TO VERIFY NO MORE THAN THE PERMITTED FLOW IS USED FOR EACH SYSTEM.

FLOAT SETTINGS & DISTANCES ABOVE THE INSIDE BOTTOM OF THE PUMP COMPT. ARE AS FOLLOWS:
ON: 21" – 304 GAL.
OFF: 20" – 290 GAL.
ALARM LEVEL: 43" – 623 GAL.
TANK INLET: 53" – 768 GAL.

DISTANCE BETWEEN ALARM LEVEL & TANK INLET IS 10" WHICH CORRESPONDS TO 145 GAL.

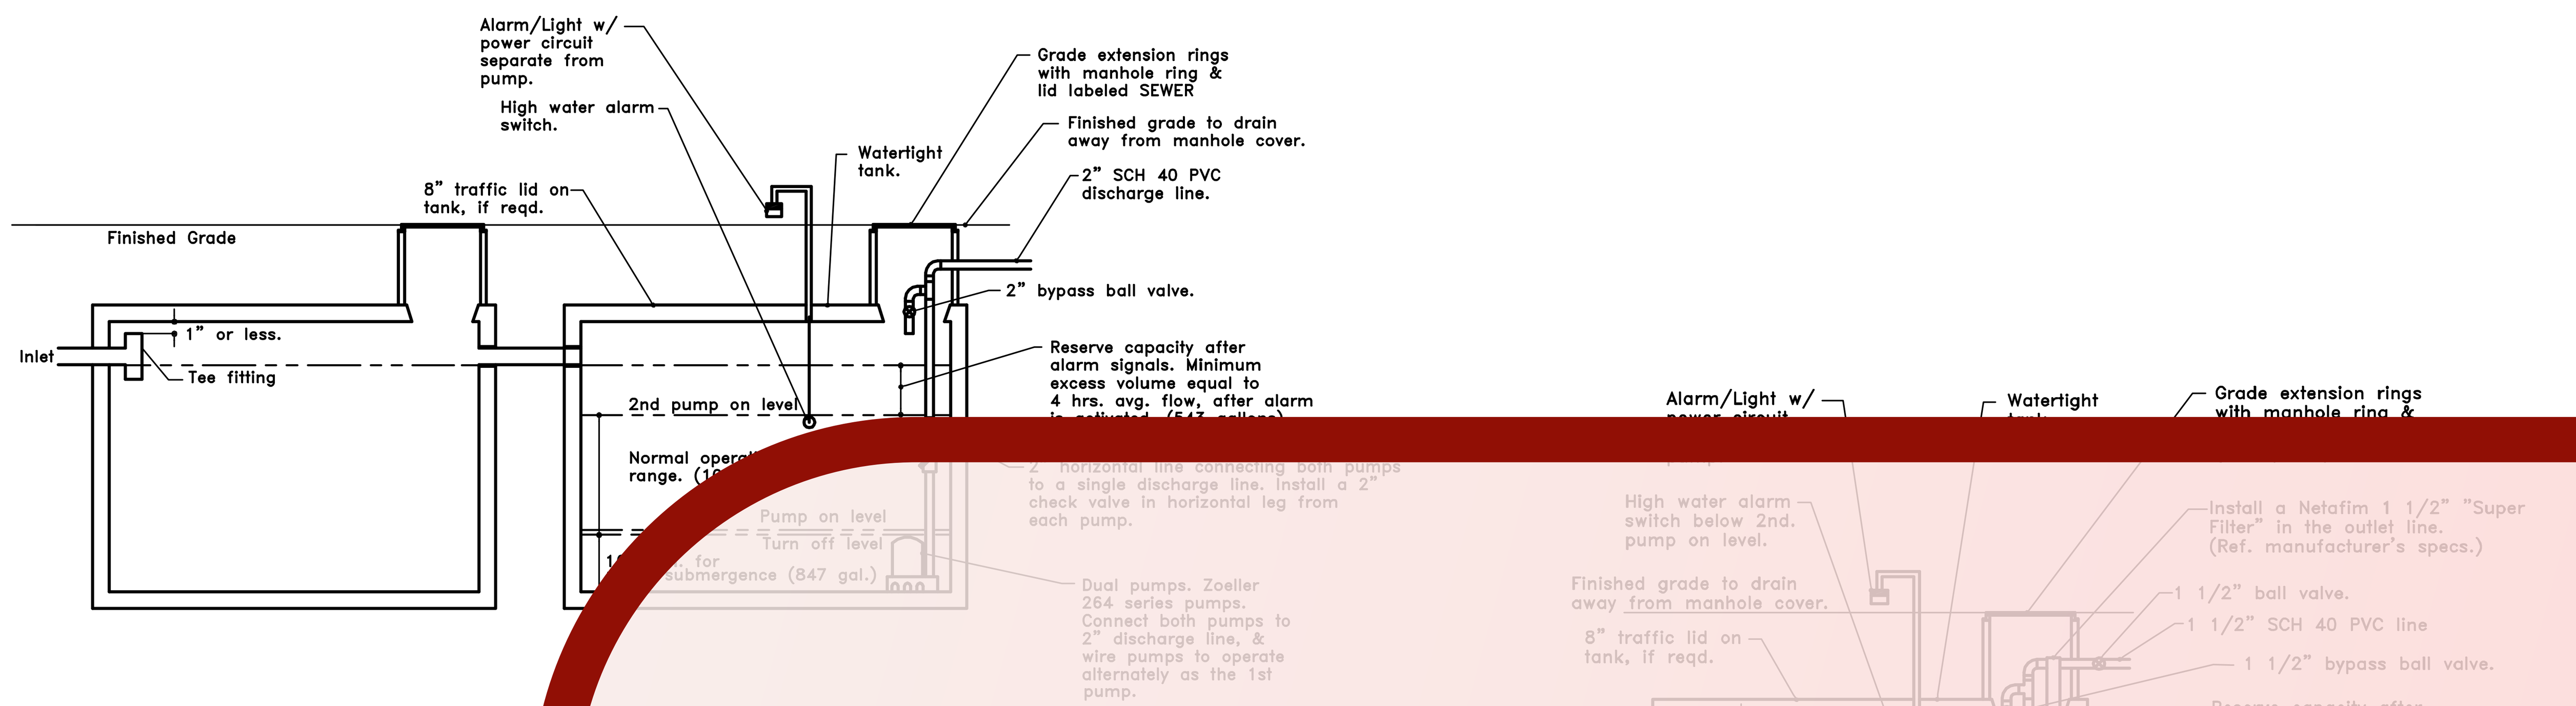
SYSTEM #2 TANK SPECS:



2000 GAL. PRE-TREATMENT TA[illegible] & 4500 GALLON EQUALIZATION TANK

SET VALVES, FLOATS, AND TIMERS TO [illegible]ER A MAXIMUM OF 16 GAL./MIN., AND 61 GALLONS PER HOUR TO THE AERO[illegible]REATMENT UNITS, TOTAL.

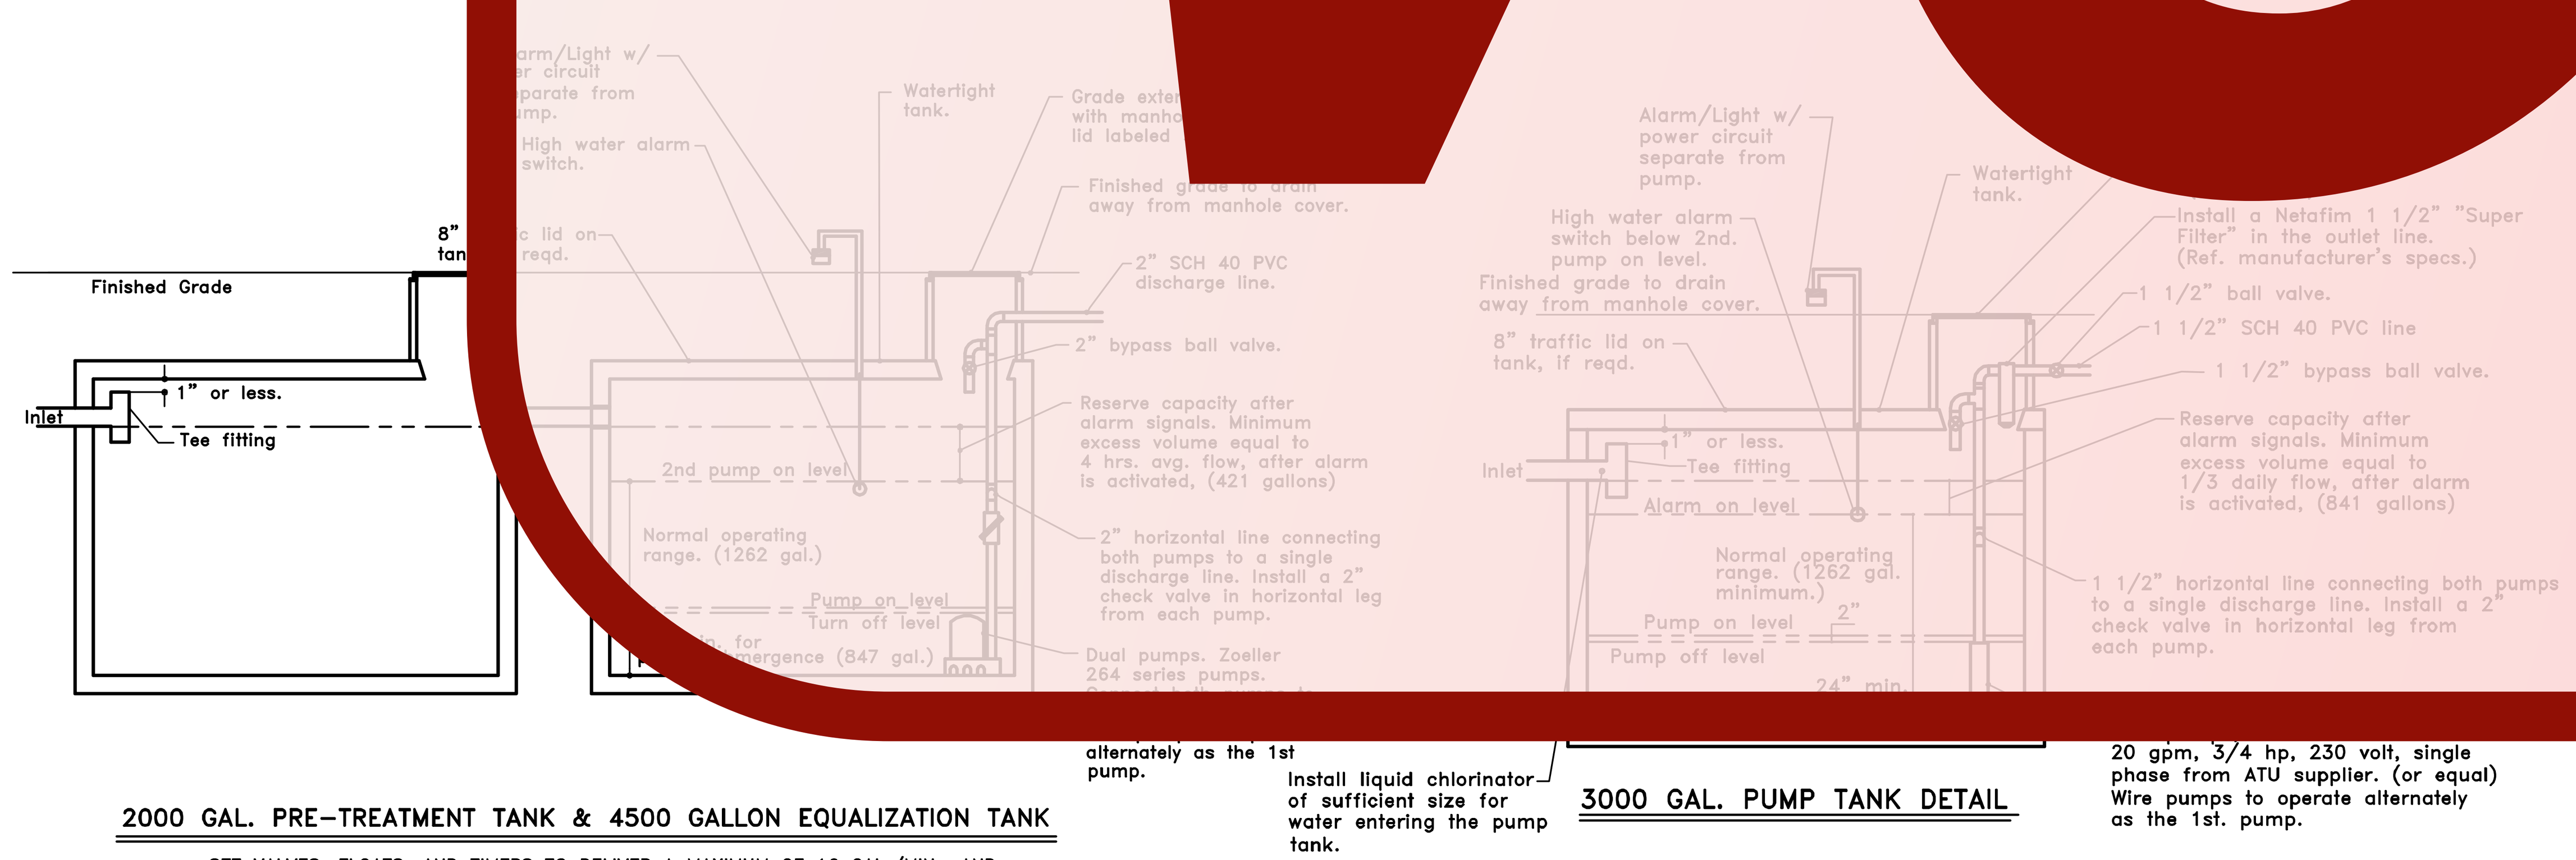
NOTES:

THE ALARM ON LEVEL SHALL BE BEL[illegible] THE 2ND PUMP ON LEVEL. THE ALARM SYSTEM SHALL HAVE A LOCK-ON FEATURE S[illegible]HAT ONCE IT IS ACTIVATED, IT WILL NOT GO OFF WHEN THE 2ND PUMP DRAWS THE L[illegible]D LEVEL BELOW THE ALARM ON LEVEL. BOTH [illegible] AND VISUAL ALARMS SHALL HAVE A [illegible]UAL SILENCE SWITCH.

ALL ELECTRICAL WIRING SHALL BE IN [illegible]CORDANCE WITH THE MOST RECENT EDITION O[illegible] NATIONAL ELECTRIC CODE. CONNECTI[illegible] SHALL BE IN APPROVED JUNCTION BOXES AN[illegible] EXTERNAL POWER WIRING SHALL BE [illegible]APPROVED ELECTRICAL CONDUIT, BURIED, AND TERMINATED AT A MAIN CIRCUIT BREA[illegible]R PANEL OR SUB-PANEL. ALL ELECTRICAL COMPONENTS SHOULD HAVE AN ELEC[illegible]CAL DISCONNECT WITHIN DIRECT VISION. ELECTR[illegible] DISCONNECTS MUST BE WEATHERPRO[illegible] (APPROVED FOR OUTDOOR USE) AND HAVE MAINTENANCE LOCKOUT PROVISIONS.

USE A LARGER TANK IF REQUIRED TO [illegible]EET MINIMUM STORAGE REQUIREMENTS.

SYSTEM #3 [illegible]ANK SPECS:



2000 GAL. PRE-TREATMENT TANK & 4500 GALLON EQUALIZATION TANK

SET VALVES, FLOATS, AND TIMERS TO DELIVER A MAXIMUM OF 16 GAL./MIN., AND 74 GALLONS PER HOUR TO THE AEROBIC TREATMENT UNITS, TOTAL.

3000 GAL. PUMP TANK DETAIL

NOTES:

THE ALARM ON LEVEL SHALL BE BELOW THE 2ND PUMP ON LEVEL. THE ALARM SYSTEM SHALL HAVE A LOCK-ON FEATURE SO THAT ONCE IT IS ACTIVATED, IT WILL NOT GO OFF WHEN THE 2ND PUMP DRAWS THE LIQUID LEVEL BELOW THE ALARM ON LEVEL. BOTH AUDIO AND VISUAL ALARMS SHALL HAVE A MANUAL SILENCE SWITCH.

ALL ELECTRICAL WIRING SHALL BE IN ACCORDANCE WITH THE MOST RECENT EDITION OF THE NATIONAL ELECTRIC CODE. CONNECTIONS SHALL BE IN APPROVED JUNCTION BOXES AND ALL EXTERNAL POWER WIRING SHALL BE IN APPROVED ELECTRICAL CONDUIT, BURIED, AND TERMINATED AT A MAIN CIRCUIT BREAKER PANEL OR SUB-PANEL. ALL ELECTRICAL COMPONENTS SHOULD HAVE AN ELECTRICAL DISCONNECT WITHIN DIRECT VISION. ELECTRICAL DISCONNECTS MUST BE WEATHERPROOF (APPROVED FOR OUTDOOR USE) AND HAVE MAINTENANCE LOCKOUT PROVISIONS.

USE A LARGER TANK IF REQUIRED TO MEET MINIMUM STORAGE REQUIREMENTS.

CALCULATIONS TO DETERMINE PERMITTED FLOW FOR COMAL COUNTY:

THE PERMITTED FLOW FOR EACH SYSTEM IS BASED ON WATER RECORDS PROVIDED BY THE OWNER OVER AN ENTIRE YEAR. THE TCEQ DAILY FLOW FOR THE PARK SHALL BE USED TO SIZE EACH SYSTEM. A DIRECT RATIO WILL BE USED TO DETERMINE HOW THAT WATER IS DISTRIBUTED THROUGHOUT THE PARK FOR THE PERMIT APPLICATIONS. SEE CALCULATIONS BELOW.

MAXIMUM DAILY DEMAND FROM FEBRUARY LODGE WATER (100510 GALLONS) AND APRIL CABINS WATER RECORDS (30480 GALLONS)

100510 GALLONS / 28 DAYS OF FEBRUARY = 3590 GPD
30480 GALLONS / 30 DAYS OF APRIL = 1016 GPD
$Q_{TOTAL-PARK-WATER-USAGE}$ = 4606 GPD

DIRECT RATIO EQUATION:

$$\frac{Q_{TCEQ-COMPONENT}}{Q_{TCEQ-TOTAL-PARK}} = \frac{Q_{COMPONENT}}{Q_{TOTAL-PARK-WATER-RECORDS}}$$

FOR SYSTEM 1 $Q_{TCEQ\ COMPONENT}$:

3 BEDROOM <2500 SQ. FT. Q = 240 GPD
OFFICE W/5 EMPLOYEES Q= 5 EMPLOYEES(4 GPD/ PERSON)=20 GPD
LAUNDRY ROOM W/ 4 WASHING MACHINES
[illegible]
3 CABINS (AS AN APARTMENT)
Q= 100 GPD/ CABIN (3 CABINS) = 300 GPD

$Q_{TCEQ\ COMPONENT}$ = 1360 GPD SYSTEM #1

FOR SYSTEM 2 $Q_{TCEQ\ COMPONENT}$:

4 CABINS (AS AN APARTMENT)
Q= 100 GPD/ CABIN (4 CABINS) = 400 GPD
6 BED MANCAMP WITH 1 COMMON BATHROOM (SIZED AS HOTEL ROOM)
Q = 60 GPD / BED (6 BEDS) = 360 GPD
SHOWER HOUSE Q = 1344 GPD (TOTAL BATH USAGE EQUALLY DIVIDED AMONGST BOTH SHOWER HOUSES. SEE CALCULATIONS FOR EXPLANATION)

$Q_{TCEQ\ COMPONENT}$ = 2104 GPD SYSTEM #2

FOR SYSTEM 3 $Q_{TCEQ\ COMPONENT}$:

Q = 17 RV (40 GPD / RV) = 680 GPD
[illegible] (AS AN APAR[illegible]
[illegible]100 GPD/ CA[illegible]
[illegible]USE Q = 134[illegible]D AMONGST BOTH SHOWER HOUSES. SEE
[illegible]TIONS FOR EX[illegible]

$Q_{TCEQ\ COMPONENT}$ = [illegible]STEM #3

FOR SYSTEM 4 Q[illegible]

[illegible] SITES (40 GP[illegible]

$Q_{TCEQ\ COMPONENT}$ [illegible]YSTEM #4

FOR SYSTEM 5 Q [illegible]

§285.31. SELECTION CRITERIA FOR TREATMENT AND DISPOSAL SYSTEMS.

(a) General Requirement. The type and size of an OSSF shall be determined on t of the soil and site information developed according to §285.30 of this title (relating to Evaluation).

(b) Suitability. A standard subsurface absorption system may be used if all the s site criteria are determined to be suitable under §285.91(5) of this title (relating to Tabl one or more of the soil and site criteria categories are determined to be unsuitable, a sta subsurface absorption system cannot be used except as noted in §285.91(5) of this title. determined that a standard subsurface absorption system cannot be used, either a prop or a non-standard system may be used, provided all soil and site criteria for that system met as required in §285.91(13) of this title.

(c) Surface drainage criteria.

(1) Topography. Uniform slopes under 30% are suitable for standard sub absorption systems. If the slope is less than 2%, steps shall be taken to ensure there is a surface drainage over any subsurface disposal field. The excavation for a standard subsu absorption system shall be parallel to the contour of the ground.

(2) Flood hazard. Any potential OSSF site within a 100-year floodplain is to special planning requirements. The OSSF shall be located so that a flood will not dam OSSF during a flood event, resulting in contamination of the environment. Planning ma shall indicate how tank flotation is eliminated. Additionally, if the site is within the regu floodway, a professional engineer shall demonstrate that:

(A) the system shall not increase the height of the flood;

(B) all components, with the exception of risers, chlorinators, cle sprinklers, and inspection ports, shall be completely buried without adding fill; and

(C) non-buried components (e.g. alarms, junction boxes, and compressors) shall be elevated above the 100-year flood elevation.

(d) Separation requirements. OSSFs shall be separated from features, in the are the OSSF is to be installed, that could be contaminated by the OSSF or could prevent th operation of the system. The separation requirements are in §285.91(10) of this title.

Adopted May 23, 2001 Effective June

b.

2. ✔ System 4-5
    a. Per our inspectors notes, we will need a revision on the tank types that were used.
        i. System 4- Si Tank/ ProFlo control panel
        ii. System 5- Si Tank/ Areis Aerobic control panel
3. ✔ Per our conversation, since the tank on system 5 is not in the floodplain, it is to your discretion on the anchors for the tank.
4. Revise accordingly and resubmit.

If you have any questions, you can email me or call the office.

REVISED
9:01 am, Dec 12, 2022

SITE EVALUATION AND CALCULATIONS

Site Evaluation:

Soil Texture:	Clay loam
Soil Structure:	Blocky
Soil Depth:	18" minimum
Restrictive Horizon:	At 18" min. from surface
Groundwater:	None encountered
Topography:	More than 2% slope on drainfield area

Determination: Site was determined to have a Class III soil. Due to the perk test and rock horizon an aerobic treatment unit followed by drip irrigation shall be installed.

VOID

Calculations:

System # was calculated low based on water records 5 gpd. The system shall be over designed to match TCEQ design rate low of gpd. Reference design 100-8497 for calculations and layout. Water saving devices are used throughout.

Q = 7 RV (40 gal. / RV)= **280 gal.**

A Nu-Water Model B-550 aerobic treatment system, or equal, shall be installed. It has built in pre-treatment tank and pump tank. The aerobic unit shall be a drip irrigation system. (Reference the System Layout) Chlorinator is required for water entering pump tank. Liquid type chlorination shall be used.

Ra = **0.20 gal. / sq. ft. / day,** **(For a Class III soil)**

A = Q / Ra, **A** = (280 gal. / day) / (0.20 gal. / sq. ft. / day) = **1400 sq. ft.**

WARRANTY DEED WITH VENDOR'S LIEN

NOTICE OF CONFIDENTIALITY RIGHTS: IF YOU ARE A NATURAL PERSON, YOU MAY REMOVE OR STRIKE ANY OR ALL OF THE FOLLOWING INFORMATION FROM ANY INSTRUMENT THAT TRANSFERS AN INTEREST IN REAL PROPERTY BEFORE IT IS FILED FOR RECORD IN THE PUBLIC RECORDS: YOUR SOCIAL SECURITY NUMBER OR YOUR DRIVER'S LICENSE NUMBER.

Date: April 15, 2021

Grantor: RAFAEL DE LEON, an unmarried man

Grantor's Address: 3660 Tanglewood Trl, Spring Branch, TX 78070

Grantee: REBECCA CREEK CAMPGROUNDS, LLC

Grantee's Address: 3660 Tanglewood Trl, Spring Branch, TX 78070

Consideration: TEN AND NO/100 DOLLARS ($10.00) and other good and valuable consideration, and a note of even date herewith, executed by Grantee, payable to the order of Grantor (the "Note"). It is secured by a vendor's lien retained in this deed and by a deed of trust of even date from Grantee to MATTHEW J. BADDERS, Trustee.

Property (including any improvements):

Tract 1: Being **14.23 acres** of land out of the Charles Murhardt Survey, Abstract No. 404, Comal County, Texas, and being further described by metes and bounds in **Exhibit "A"** attached.

Tract 2: Being **2.0 acres** of land out of the Charles Murhardt Survey, Abstract No. 404, Comal County, Texas, and being further described by metes and bounds in **Exhibit "B"**, attached.

Reservations from Conveyance; Exceptions to Conveyance and Warranty:

This conveyance is made and accepted subject to conditions, restrictions, and easements appearing of record, if any, in Comal County, Texas, which affect the hereinabove described property; and

Conveyance:

Grantor, for the Consideration and subject to the Reservations from Conveyance and Exceptions to Conveyance and Warranty, grants, sells, and conveys to Grantee the Property, together with all and singular the rights and

appurtenances thereto in any way belonging, to have and hold it to Grantee and Grantee's heirs, successors, and assigns forever. Grantor binds Grantor and Grantor's heirs and successors to warrant and forever defend all and singular the Property to Grantee and Grantee's heirs, successors, and assigns against every person whomsoever lawfully claiming or to claim the same or any part thereof, except as to the Reservations from Conveyance and the Exceptions to Conveyance and Warranty.

The vendor's lien against and superior title to the Property are retained until each note described is fully paid according to its terms, at which time this deed will become absolute.

This conveyance is made **subject to** the prior lien ("Underlying Lien") of a deed of trust recorded as Instrument Number 201506025975, Real Property Records of Comal County, Texas, to EDWARD L. LETTE, Trustee thereunder, which secures payment of a promissory note ("Underlying Lien Debt") in the original principal amount of FOUR HUNDRED AND SIXTY-FIVE THOUSAND DOLLARS ($465,000.00). Grantee in this deed does not assume payment of that Underlying Lien Debt; provided, however, that any payments advanced by Grantee applied directly to the Underlying Lien Debt principal shall be applied to reduce the principal balance of the Note. As further consideration Grantor promises to keep and perform all of the covenants and obligations of the grantor named in the Underlying Lien deed of trust and to indemnify, defend, and hold Grantee harmless against any damages caused by Grantor's breach of its obligation under the Underlying Lien Debt and related documents, as long as Grantee is not in default on the Underlying Lien Debt and documents relating to it.

When the context requires, singular nouns and pronouns include the plural.

EXECUTED this the 15 day of April, 2021.

METES & BOUNDS DESCRIPTION

OF A 14.23 (CALLED 14.15) ACRE TRACT OF LAND OUT OF THE CHARLES MURHARDT SURVEY, ABSTRACT NO. 404, COMAL COUNTY, TEXAS, BEING THE SAME TRACT OF LAND AS DESCRIBED IN A DEED FROM ROEDERER ENTERPRISES, LLC TO RICHARD ROEDERER IN DOCUMENT NO. 200906004161, OFFICIAL PUBLIC RECORDS OF COMAL COUNTY, TEXAS, SAID TRACT BEING MORE PARTICULARLY DESCRIBED AS FOLLOWS:

BEGINNING at a found ½" iron rod in the cul-de-sac of Tanglewood Trail (a 50' Public R.O.W.) for the most westerly northeast corner of the herein described tract, the southeast corner of Lot 1R and 5, Cypress Cove Subdivision Section One, as recorded in Vol. 1, Pg. 45, Map and Plat Records of Comal County, Texas, said rod being a point of curvature;

THENCE along and with a non-tangent curve to the left with the following parameters:

Radius: 67.00 feet
Arc Length: 130.98 feet
Chord Length: 111.10 feet
Chord Bearing: South 73°24'34" East
Delta Angle: 112°00'24"
To a set ½" iron rod for an angle point, the northwest corner of a 30' Ingress-Egress Easement as recorded in Vol. 296, Pg. 130, Deed Records of Comal County, Texas, the northwest corner of a called 1.31 acre tract as described in a deed to Chapel in the Cove recorded in Vol. 334, Pg. 331, Deed Records of Comal County, Texas;

THENCE along and with said easement, South 48°57'00" East, a distance of 35.73 feet to a set ½" iron rod for a point of curvature;

THENCE along and with a tangent curve to the left with the following parameters:

Radius: 221.50 feet
Arc Length: 93.17 feet
Chord Length: 92.48 feet
Chord Bearing: South 61°00'00" East
Delta Angle: 24°06'00"
To a set ½" iron rod for a point of reverse curvature;

THENCE along and with a tangent curve to the right with the following parameters:

Radius: 205.27 feet
Arc Length: 196.27 feet
Chord Length: 188.88 feet
Chord Bearing: South 45°39'30" East
Delta Angle: 54°47'00"
To a set ½" iron rod for a point of tangency;

THENCE continuing along and with said easement, South 20°25'31" East, a distance of 388.07 feet (called South 18°16'00" East, a distance of 399.55 feet) to a set ½" iron rod for an angle point of the herein described tract, a point in the north boundary line of Water Plant No. 1, as recorded in Vol. 296, Pg. 125, Deed Records of Comal County, Texas;

THENCE along and with the common boundary line of the herein described tract and said Water Plant No. 1, the following courses and distances:

South 61°41'00" West, a distance of 31.53 feet to a set ½" iron rod for an angle point of the herein described tract, the northwest corner of said Water Plant No. 1;

South 28°50'00" East, a distance of 59.77 feet to a set ½" iron rod for an angle point of the herein described tract, the southwest corner of said Water Plant No. 1;

North 62°20'00" East, a distance of 60.12 feet to a set ½" iron rod for an angle point of the herein described tract, the southeast corner of said Water Plant No. 1;

North 27°02'52" West, a distance of 60.46 feet to a set ½" iron rod for an angle point of the herein described tract, the intersection of said 30' easement and said Water Plant No. 1;

THENCE along the common boundary of the herein described tract and said 1.31 Acre Tract, the following courses and distances:

North 18°16'00" West, a distance of 139.52 feet to a found ½" iron rod for an angle point;

South 45°40'30" East, a distance of 57.57 feet (called South 45°39'00" East, a distance of 57.53 feet) to a found ½" iron rod for an angle point;

South 51°41'46" East, a distance of 107.75 feet (called South 51°48'00" East, a distance of 107.56 feet) to a found ½" iron rod for an angle point;

North 05°47'32" West, a distance of 113.27 feet (called North 05°53'40" West, a distance of 113.05 feet) to a found ½" iron rod for an angle point;

North 11°48'30" West, a distance of 143.52 feet (called North 11°43'40" West, a distance of 143.30 feet) to a found ½" iron rod for an angle point;

North 07°28'24" West, a distance of 190.98 feet (called North 07°27'40" West, a distance of 191.21 feet) to a found ½" iron rod for an angle point;

North 11°18'10" West, a distance of 183.08 feet (called North 11°20'40" West, a distance of 183.01 feet) to a found ½" iron rod for the most easterly northwest corner of the herein described tract, an angle point of said 1.31 Acre Tract;

North 89°29'40" East, a distance of 377.90 feet (called North 89°29'58" East, a distance of 378.05 feet) to a found pipe for the northeast corner of the herein described tract, the most easterly southeast corner of said 1.31 Acre Tract, a point in the banks of the Guadalupe River (Canyon Lake);

THENCE along and with the meanders of said River, the following courses and distances:

South 00°31'15" East, a distance of 250.63 feet (called South 00°30'00" East, a distance of 250.48 feet) to a found concrete monument for an angle point;

South 09°59'06" East, a distance of 550.91 feet (called South 09°59'33" East, a distance of 550.70 feet) to a found ½" iron rod for the southeast corner of the herein described tract;

South 78°35'52" West, a distance of 60.88 feet to a point of reference for an angle point;

South 59°51'12" West, a distance of 527.23 feet (called South 59°48'24" West, a distance of 527.36 feet) to a found ½" iron rod for the southwest corner of the herein described tract, the most easterly corner of Lot 123, Cascada at Canyon Lake Unit 2, as recorded in Doc. No. 201203035725, Official Public Records of Comal County, Texas;

THENCE with the common boundary of the herein described tract and said Cascada Tract, North 33°44'42" West, a distance of 663.84 feet (called North 33°45'26" West, a distance of 663.95 feet) to a found ½" iron rod for an angle point;

THENCE continuing along and with said boundary, North 29°11'00" West, a distance of 513.55 feet (called North 29°11'00" West, a distance of 513.74 feet) to a found 60d nail for the northwest corner of the herein described tract, the southwest corner of said Lot 1R and Lot 5, Cypress Cove Section One;

THENCE along and with the common boundary of the herein described tract and said Lot 1R and 5, North 89°58'56" East, a distance of 166.95 feet (called East, a distance of 167.08 feet) to the **POINT OF BEGINNING** and containing 14.23 acres, more or less.

STATE OF TEXAS §

EXHIBIT "B"

FIELD NOTES DESCRIBING
2.0 ACRES OF LAND
IN COMAL COUNTY, TEXAS

Being 2.0 acres of land situated within the Charles Murhardt Survey Number 48, Abstract 404, Comal County, Texas. Said 2.0 acres of land being that same property, called Tract 2, as described in Warranty Deed of Assumption dated September 13, 1983, Grantor: Howard D. Spandau, Grantee: James H. Borlack and wife, Celia G. Borlack, recorded in volume 352, page 17 of the Deed Records of Comal County, Texas. A plat of survey has been prepared to accompany these field notes. The bearings recited herein are based on the hereinabove Tract 2 recorded in volume 352, page 17. Said 2.0 acres of land being more particularly described as follows:

BEGINNING at a found iron pin being the northwest corner of this herein described 2.0 acres of land, from which a found iron pin being the west corner of Lot 82, Cypress Cove Subdivision, Section 5, bears, as a reference, North 30°18'22" West, 731.34 feet. Said Cypress Cove Subdivision, Section 5, being as recorded in volume 1, page 77 of the Map and Plat Records of Comal County, Texas;

THENCE North 87°00'16" East, 298.86 feet to a found iron pin being the northeast corner of this herein described 2.0 acre tract of land;

THENCE South 02°44'09" East, (record bearing South 02°59'30" East), 220.89 feet to a found iron pin being the southeast corner of this herein described 2.0 acre tract of land;

THENCE South 53°12'59" West, 69.96 feet to a found iron pin;

THENCE South 66°59'51" West, (basis of bearings), 256.34 feet to a found iron pin being the southwest corner of this herein described 2.0 acre tract of land;

THENCE North 02°48'19" West, (record bearing North 02°59'30" West), 347.50 feet to the Place of Beginning and containing 2.0 acres of land in Comal County, Texas according to an actual survey made on the ground under my supervision on April 14, 2004.

AGREEMENT

I. General:

This work for hire agreement (hereinafter referred to as "Agreement") is entered into by and between the Client and Luna Environmental, LLC (hereinafter referred to as “Contractor”), located at 9595 Ranch Rd 12 Suite #1 Wimberley, TX 78676. By this agreement, Contractor agrees to render services, as described herein, and Client agrees to fulfill his/her/their responsibilities under the agreement as described herein.

II. Dates & Fees:

This agreement commences upon receipt by the Contractor of notice that the Local Regulatory Agency has given final approval of the installation (for a new or modified system), or on **5/8/2025** for an existing system, provided the Contractor has received payment in full of Fee(s) as agreed herein. The fees for this agreement are **$325.00** and shall be prepaid per the payment terms outlined herein.

III. Renewal Terms:

The term of this Agreement is **1 year(s)** but in no case shall the Fee to the Contractor be for less than **one (1) year**. This Agreement is non-expiring and automatically renews without need for signing of any additional document(s) - provided Client continues to timely pay the Fee(s) when due. Agreements paid monthly are paid using Contractor’s system for automatic debit or automatic draft. Agreements that are prepaid will be invoiced by Contractor before the due date and must be timely paid by Client. If not timely paid before the due date, the Contractor has the right to terminate this Agreement.

IV. Services by Contractor:

1. Inspect and perform routine maintenance on the On-Site Sewage Facility (“OSSF”) in compliance with code, regulations, and/or rules of the Texas Commission on Environmental Quality (“TCEQ”) and county in which the OSSF is located and the manufacturer’s requirements, at a frequency of approximately once per year for LPD systems, once every four (4) months for residential properties, or once every one (1) month for commercial properties.

2. Inspection, adjustment, and servicing of the mechanical, electrical, and other components to ensure proper functioning. This includes inspecting control panels, air pumps, air filters, diffusers, floats, and spray heads.

3. Effluent Inspection will include the following: effluent quality (color, turbidity, overflow, and odor), testing effluent chlorine and pH levels, when necessary, alarm function, filters, operation of effluent pump and chlorinator. Unless otherwise agreed to, Contractor does not provide chlorine. BOD and TSS annually on commercial accounts, additional charges apply.

4. Notify Client of any repairs needed to keep OSSF in proper working condition and up to regulatory standards. Items under warranty may be repaired while the technician is on-site. Additional charges may apply for labor and service calls. Repair quotes of non-warranty items must be approved by Client before work is performed.

5. Report to the appropriate regulatory authority and to Client, as required by the State of Texas' on-site rules and, if required, TCEQ or County rules. All findings must be reported to the appropriate regulatory authority within 14 days.

6. Visit site within 48 hours of a service request.

7. Provide Customer Support line at (855) 560-9909.

V. Client Responsibilities:

1. Maintain a current License to Operate and abide by the conditions and limitations of that license and all requirements for OSSF from the State and Local Regulatory Agency as well as manufacturer's recommendations.

2. Maintain disinfection unit and at all times provide proper and adequate chlorine supply or operating disinfection component, if OSSF is equipped with same.

3. Provide all necessary site, yard, or lawn maintenance and removal of obstacles, including dogs and other animals, as needed to allow the system and its components to function properly and to allow Contractor safe and easy access to all parts of the system and its components.

4. Maintain site drainage to prevent adverse effects on OSSF.

5. Provide for pumping of tanks, when and as suggested by Contractor, at Client's own expense. Typically, every 3 years.

6. Do not exceed the system's physical, hydraulic, or biological limitations.

7. Notify Contractor within 24 hours of the occurrence of any and all alarms or problems with any component or with the system.

8. Be available by text, phone, or in person when the Contractor is on-site in case of required repair approvals or questions.

9. Promptly pay Contractor's bills, fees, and invoices in full.

10. Elect one of the following: Authorized

Yes, I authorize. If during the Contractor's time of the maintenance check any component of the system is found to need replacement, replenishment, or repair, then Client authorizes Contractor to perform the service per the above and bill or charge the Client for such additional services without further approval by Client so long as the service is $150 or less and the Contractor has the necessary materials to perform the replacement, replenishment, or repair.

No, I do not authorize. If, during the Contractor's maintenance check, any component of the system is found to be in need of replacement, replenishment, or repair, Contractor will notify Client of repairs needed and, where feasible, provide an estimate of costs. No replacement, replenishment, or repairs will be performed without express approval of Client. Additional Service fees will apply for return visits to perform repairs.

VI. Authority:

In signing this Agreement, the Client: (1) hereby affirms ownership to the Property as well as the OSSF that is the subject of this Agreement. (2) represents that he/she has authority to permit Contractor's entry upon property to monitor, service, or repair and agrees to hold Contractor and its agents harmless for entry upon such real property for these purposes, and (3) represents to have the authority to bind all owners of the property to the terms of this agreement, or to accept personal responsibility for these terms.

VII. Access By Contractor:

Contractor is hereby granted access to the system and all related components for the purposes of performing the Services or Additional Services. Unless other arrangements have been made in advance in writing, Contractor's personnel may enter the property at reasonable times without any form of notice for the purpose of performing the Services or Additional Services. Contractor will require free, unrestricted access to the system and related components for the purpose of performing all work. If upon arrival at the site, Contractor determines that access is prevented, blocked, or restricted, Contractor is not required to perform any of the steps, and will be credited with completion of that maintenance check. Additional maintenance checks to complete the Services shall be billed to Client as an Additional Service.

VIII. Payment Terms:

The fee for this agreement only covers the services described herein. This fee does not cover equipment or labor for non-warranty repairs, labor for warranty repairs, or service charges resulting from unscheduled, Client requested trips to the Client's OSSF. Payments not received within 30 days from the date of invoicing will be subject to a $30.00 late penalty and or a 1.5% monthly carrying charge, whichever is greater. By signing this contract, the Client authorizes the Contractor to remove any parts which were installed but not paid for at the end of 30 days. The Client is still responsible for any labor costs associated with the installation and removal of said parts. All invoices are due upon receipt by Client. Under no condition shall prepayment of Fee, or the sum of monthly payments of Fee, be for less than a **one-year** term. After **1 year(s)**, prepaid agreements (other than monthly) may be prorated using monthly increments, less other charges as discussed elsewhere in this Agreement.

VIII. Application or Transfer of Payment:

The Fee paid for this Agreement may transfer to the subsequent owner(s), however, this Agreement will not transfer. Client will advise subsequent owner(s) of the regulatory requirement for a replacement Agreement. Regulations require that replacement Agreements be signed and received within 30 days of transfer of ownership. Contractor will apply all funds received from Client first to any past-due obligations arising from this Agreement including late charges, returned check charges, and charges for repairs or services not paid within 10 days of invoicing. Unpaid balances on Client's account may lead to the extension of the monthly drafting or debiting program, if applicable, to complete payment of Client's account balance(s).

X. Termination of This Agreement:

After a minimum of **1 year(s)**, in order to provide sufficient time to comply with the regulatory requirement for notices from the Contractor to the Local Regulatory Agency, this Agreement may be terminated for any reason by either party with a minimum 30 day written notice, without fault of the terminating party. Contractor shall be due a Fee equal to at least the first year and may also deduct for any other work performed by Contractor but not yet paid by Client, whether invoiced prior to termination or not. Contractor will notify the appropriate Local Regulatory Agency of this termination.

XI. Limitation of Liability:

In no event shall the Contractor be liable for indirect, consequential, incidental, or punitive damages, whether in contract, tort, or any other theory of liability. In no event shall the Contractor's liability for the direct damages exceed payments by the Client under this agreement.

XII. Severability:

If any provision of this agreement shall be held to be invalid or unenforceable for any reason the remaining provisions shall continue to be held valid and enforceable. If a court finds that any provision of this agreement is invalid or unenforceable, by limiting such provision it would become valid and enforceable, then such provision shall be deemed to be written, construed, and enforced as so limited.

Maintenance Contract

THIS CONTRACT is made and entered into on July 8th 2025, by and between Valdes Drilling LLC (the "Service Company"), whose address is 11235 US HWY 181 S, San Antonio, Texas 78223 and Rebecca Creek Campgrounds ("Customer"), whose address is 3660 Tanglewood Trl, Spring Branch TX 78070. System #5 (113612)

WHEREAS Service Company is a company engaged in the business of servicing and maintaining Commercial and residential septic installations, and maintenance providing tanks. and is willing to provide such services to Customer as per the terms herein.

1. 12 inspections a year/service calls (at least one every month), for a total of 12 over the one yearnperiod including inspection, adjustment and servicing of the mechanical, electrical and other applicable component parts to ensure proper function. This includes inspecting the control panel, air pumps, air filters, diffuser operation. Any alarm situation affecting the proper function of the Aerobic process will be addressed within a 48-hour time Frame. Repair work on non-warranty parts will include price for parts & labor. The prices will be quoted before the work is performed.

2. An effluent quality inspection consisting of a visual check for color, turbidity, scum overflow and examination for odors.

3. If any improper operation is observed, which cannot be corrected at the time of the service visit, you will be notified immediately in writing of the conditions and estimated date of correction.

5. Any additional visits, inspections or sample collection required by specific Municipalities, Water/River Authorities, and County Agencies the TCEQ or any other authorized regulatory agency in your jurisdiction will be covered by this policy.

IMPORTANT: The Homeowners Manual must be strictly followed or warranties are subject to invalidation. Pumping of sludge build-up, repairs/ labor and materials, or any abuse of the system is not covered by this policy and will result in additional charges.

ACCESS BY CONTRACTOR

The Contractor Or anyone authorized by the Contractor may enter the property at reasonable times without prior notice for the purpose of the above described Services. The contractor may access the System components including the tanks by means of excavation for the purpose of evaluations if necessary.

2. Trained Employees

Trained personnel directly employed and supervised by the Service Company will perform all services required by the terms of this Contract. The Service Company agrees that each of its employees will be properly qualified and will use reasonable care in the performance of his or her duties.

3. Working Hours

(a) The services required of the Service Company under this Contract, including emergency service, shall be performed during the regular working hours of its regular working days, consisting of Monday to Saturday, Anytime, except as provided in (b) immediately below.

(b) If the Customer requests that the Service Company perform any of its services at times other than during its regular working hours, then for the services performed outside the regular working hours ("overtime hours"), the Customer shall be charged at $200.00 per hour as adjusted periodically to compensate for changes in the cost of labor.

4. Contract Price

(a) The Customer shall pay the Service Company at the rate of $950.00 (one time payment). for the one year of service to be performed under this Contract.

(b) The amount specified in (a) above shall be adjusted annually to reflect any changes in the Service Company's cost of labor. 0 percentage of the contract price shall be increased or decreased on each anniversary of the commencement date of service under this Contract with the percentage of increase or decrease in the straight-time hourly cost (which means the straight-time hourly labor rate, including fringe benefits) for the month within which the anniversary of the commencement of service under this Contract falls as compared with the straight-time hourly cost for the month within which the commencement date of service under this Contract falls.

(c) The amount specified in (a) above shall be adjusted annually to reflect any changes in the costs of the parts, equipment, and materials supplied by the Service Company under this Contract. 5 percentage of the contract price shall be increased or decreased on each anniversary of the commencement date of service under this Contract by the percentage of increase or decrease in the costs of the parts, equipment, and materials.(d)

6. Term of Contract

The term of this Contract shall commence on the start date of signature date and shall continues in full force and effect until it is terminated. Either party, by giving 7 days' written notice to the other party, may terminate this Contract either at the completion. or at the end of any subsequent year. In any event, this Contract shall be in effect for a minimum of 1 year.

7. Miscellaneous Provisions

(a) Applicable Law: This Contract shall be construed under and in accordance with the laws of the Texas, and all obligations of the parties created under this Contract are performable in Comal County, Texas.

(b) Parties Bound: This Contract shall be binding on and inure to the benefit of the parties to this Contract and their respective heirs, executors, administrators, legal representatives, successors and assigns as permitted by this Contract.

(c) Legal Construction: In the event any one or more of the provisions contained in this Contract shall for any reason be held invalid, illegal, or unenforceable in any respect, that invalidity, illegality, or unenforceability shall not affect any other provision. This Contract shall be construed as if the invalid, illegal, or unenforceable provision had never been contained in it.

(d) Prior Contracts Superseded: This Contract constitutes the sole and only Contract of the parties and supersedes any prior understandings or written or oral Contracts between the parties respecting the subject matter of this Contract.

(e) Amendments. This Contract may be amended by the parties only by a written Contract.

(f) Attorneys' Fees: If any action at law or in equity is brought to enforce or interpret the provisions of this Contract, the prevailing party will be entitled to reasonable attorneys' fees in addition to any other relief to which that party may be entitled.

8. Signatures

This Contract shall be signed on behalf of Valdes Drilling LLC by Julio Valdes #MP0002736, its Owner, and on behalf of Rebecca Creek Campgrounds, Property Owner: Michelle.
