Date Soil Survey Performed: 11/26/2024
 Site Location: 11550 Rebecca Creek Road
 Name of Site Evaluator: Hoyt Seidensticker Registration Number: OS0008771
 Proposed Excavation Depth: 36 inches County: comal

Requirements:

At least two soil excavations must be performed on the site, at opposite ends of the proposed disposal area.
 Location of soil boring or dug pits must be shown on the site drawing.
 For subsurface disposal, soil evaluation must be performed to a depth of at least two feet below the proposed excavation depth. For surface disposal, the surface horizon must be evaluated.
 Describe each soil horizon and identify any restrictive feature on the form. Indicate depths where features appear.

ON-SITE SEWAGE FACILITY DESIGN CRITERIA

Rogelio and Luisa Aguilar and Gabriela Aguilar

All tanks must have inspection or cleanout ports located on the tank top over all inlet and outlet devices. Each inspection or cleanout port must be offset to allow for pumping of the tank. The ports may be configured in any manner as long as the smallest dimension of the opening is at least 12 inches, and large enough to provide for maintenance and equipment removal. All inspection and cleanout ports shall have riser over the port openings, which extend to two inches above grade. A secondary plug, cap, or other suitable restraint system shall be provided below the riser cap to prevent tank entry if the cap is unknowingly damaged or removed

The risers shall have inside diameters which are equal to or larger than the inspection or cleanout ports. Risers must be permanently fastened to the tank lid or cast into the tank. The connection between the riser and the tank lid must be watertight. Risers must be fitted with removable watertight caps and protected against unauthorized intrusions by either a padlock, a cover that can be removed with specialized tools, a cover having a minimum net weight of 29.5 kilograms (65 pounds) set into a recess of the tank lid, or another means approved by the executive director. Risers and riser caps exposed to sunlight must have ultraviolet light protection. Risers must be able to withstand the pressures created by the surrounding soil.

All design criteria is in accordance with TCEQ, Title 30, TAC Chapter 285, Subchapter D, On-Site Sewage Facilities (Effective December 29, 2016). DESIGN CRITERIA

Rogelio and Luisa Aguilar and Gabriela Aguilar

All tanks must have inspection or cleanout ports located on the tank top over all inlet and outlet devices. Each inspection or cleanout port must be offset to allow for pumping of the tank. The ports may be configured in any manner as long as the smallest dimension of the opening is at least 12 inches, and large enough to provide for maintenance and equipment removal. All inspection and cleanout ports shall have risers over the port openings, which extend to two inches above grade.

A secondary plug, cap, or other suitable restraint system shall be provided below the riser cap to prevent tank entry if the cap is unknowingly damaged or removed.

The risers shall have inside diameters which are equal to or larger than the inspection or clean out ports. Riser must be permanently fastened to the tank lid or cast into the tank. The connection between the riser and the tank lid must be watertight. Riser must be fitted with removable watertight caps and protected against unauthorized intrusions by either a padlock, a cover that can be removed with specialized tools, a cover having a minimum net weight of 29.5 kilograms (65 pounds) set into a recess of the tank lid, or any other means approved by the executive director. Riser and riser caps exposed to sunlight must have ultraviolet light protection. Riser must be able to withstand the pressures created by the surrounding soil.

Effective September 1, 2023, inspection and cleanout ports shall have risers over the port opening, which extend to two inches above grade. A secondary plug, cap, or other suitable restraint system shall be provided below the riser cap to prevent tank entry if the cap is unknowingly damaged or removed.
