COMAL COUNTY
Regional Habitat Conservation Plan
Subdivision Development in Comal County
History of the Comal County RHCP

• In 2006 the County received an ESA section 6 HCP Planning Assistance Grant of $612,852; a 25% local match was required for this Federal grant

• Funds have been used to convene and seek input from a Citizens Advisory Committee and a Biological Advisory Team and to prepare a draft RHCP and EIS

• In 2007 the County received a Federal Recovery Land Acquisition Grant of $652,312 for purchase of the 288-acre Morton tract

• A public scoping meeting was held on October 16, 2008, to help identify issues to be addressed in the EIS

• Two USFWS workshops with the consulting team were held in 2008 and 2009

Preserve the open space heritage of Comal County while conserving endangered species

Provide the County and affected landowners within the County a more efficient process for complying with the ESA compared to individual permitting through the Service
Comal County has over 65,000 acres of potential endangered species habitat

The Federal Endangered Species Act prohibits harming listed species

The ESA provides for “take” permits or habitat conservation plans (HCP’s)
The Covered Species and Covered Actions

- Evaluation Species – the Cagle’s map turtle and six species of invertebrates that have been petitioned to be listed by the Forest Guardians

- The Covered Actions – public infrastructure, public and private development projects, school development and improvement.

golden-cheeked warbler  
black-capped vireo
The golden-cheeked warbler is an insect-eating bird that is totally dependent on stands of mature ashe juniper in Texas for nesting habitat. Warblers arrive at their breeding grounds mid-March, returning to the same territories each year and nesting from April to May.
The warbler’s population has declined dramatically in the last 20 years. In 1974, the population was estimated at 15,000 to 17,000 birds. In 1990, it had dropped to 2,200 to 4,600.

The warbler was listed as endangered under the Endangered Species Act (ESA) in the United States in December 1990.

Listing the species has led to controversy because landowners may be restricted in developing their property if it contains warbler habitat.
Protection Under the Endangered Species Act
In the United States, it is illegal to “take” (kill, capture, wound, harass, or harm) a species that is on the Endangered Species Act’s list of threatened or endangered species. Harm to the species includes destroying habitat if doing so kills or injures members of the species.
Two options for compliance:

1. **Individual Consultation with the USFW Service.**

2. **Obtain a permit from a County with a Regional Habitat Conservation Plan.**
What’s in the Plan and the Permit?

1. Voluntary development of preserves.

2. Ability to permit “incidental take” within Comal County.
